Utu me ngā Hāmene - Fees and Charges *- We are proposing to increase fees and charges in a number of council services to move the burden away from the general rate payer towards the individual directly receiving the service.*

Which options for fees & charges do you support?

Further feedback on Fees and Charges:

Ō Reiti - Your Rates *- The uniform annual general charge (UAGC) is the fixed portion of rates that every ratepayer pays regardless of property value.*

Which option for the change in UAGC do you support?

Further feedback on the UAGC and Rates: Hi,

Please consider this complaint and my feedback below on the proposed RLC Long Term Plan annual rates increases.

My first comment;

Do you think the residents of Rotorua are so naïve that by you initially proposing an average 9.2% increase for the 2021/22 period that

we will not be aware when you are forced by public opinion to reduce it to say 4% or 5% that we do not know the game you are playing.

That is, hitting us hard with a high figure so that when it is reduced to a still completely unreasonable figure you can tell us all how

wonderful you are.

We are not that gullible.

Secondly;

Over the period that Mayor Chadwick has held office my rates have increased by just over 34%. When this is compared to the annual inflation

rate of 8.9% for the same period it demonstrates a serious lack of financial management. Please refer to the attached spreadsheet.

Thirdly;

This Council (elected and RLC staff) need to understand the majority of Rotorua citizens cannot continually fund their vanity projects and

we expect those who are our elected representatives to ensure only core activities are undertaken with sound financial governance.

Finally;

Considering the financial hardships a significant percentage of the community is facing as a result of Covid-19 it is ludicrous to even consider any

increase above the annual inflation rate.

Grant Chapman

Sent: Monday, 29 March 2021 11:47:24 PM

To: info@rotorualc.nz

Subject: Complaint re intended rate rises.

I am a pensioner and still working yet find it very difficult to pay the exorbitant rates u presently lump upon us.

Admin intend to increase the already outlandish fees",

I strongly object and demand our present Mayor's resignation

and suggest an immediate vote of no confidence in her ability to administrator proper leadership.

Her constant misuse of ratepayers funds can no longer be tolerated.

Bullying of councilors by the Mayor or

Deputy' shd be eradicated''

We vote councilors in as our voice speaking for us' they are to be respected not ignored.

Greg cox LBP

Further feedback on the Long Term Plan:

On p8 of the draft plan, there is an area in Ngongotaha earmarked in purple for future Residential. Placing residential here ignores the pre-existing rail corridor and draft central government plans to extend / reinstate regional rail to Rotorua in the future. Adding future NIMBYs to the neighbourhood will only reduce the chance of enhancing public transport to Rotorua.

On the subject of residential areas, council should investigate Netherlands-style 'Woonerf' neighbourhoods and implement where possible. Areas like Lynmore have roads that are way too wide and fast for their residential access purpose and are consequently used as rat-runs for gravel trucks going to and from Okareka. Through traffic should be diverted around homes wherever possible and new residential designed as 'living streets'.

Which option do you support? E aua - Not sure

Further feedback on the Aquatic Centre: I support the full upgrade provided the charges to users are kept at a reasonable level. I would not like ratepayers money go to enable some multinational management outfit to set prices for the use of the facility that exclude local people from benefitting from the use of the complex.I support the full upgrade provided the charges to users are kept at a reasonable level. I would not like ratepayers money go to enable some multinational management outfit to set prices for the use of the facility that exclude local people from benefitting from the use of the complex.

Whakahaumaru Hapori - Community Safety *- Council has a Draft Community Safety Plan that needs support.*

Which options to fund and deliver work to improve community safety do you support? Kōwhiri Tuatoru, Me whakatinana i tētahi mahere whakahaumaru hapori, kāore anō he pūtea e tāpae ana - Option 3, Adopt a community safety plan with no further financial contribution

Further feedback on Community Safety: The dumping of high needs homeless people in Rotorua needs to stop. Motels need to be used for short term visitor accommodation only, not halfway houses for people with social problems. Council needs to remind central government to sort out its problems.

Utu me ngā Hāmene - Fees and Charges *- We are proposing to increase fees and charges in a number of council services to move the burden away from the general rate payer towards the individual directly receiving the service.*

Which options for fees & charges do you support? Kōwhiri Tuarua, Panoni/whakapiki rānei ngā utu me ngā hāmene - Option 2, Adjust/increase fees and charges

Further feedback on Fees and Charges: Our rates have increased quite enough thank you. Maybe council should look at operating more efficiently in order to save money.

Ō Reiti - Your Rates *- The uniform annual general charge (UAGC) is the fixed portion of rates that every ratepayer pays regardless of property value.*

Which option for the change in UAGC do you support? E aua - Not sure

Further feedback on the UAGC and Rates: Can we get some maintenance done around the place. especially the waste water infrastructure

---

Further feedback on the Long Term Plan:

I think that council needs to get the basics sorted before embarking on grandiose schemes. I am against the forced closing of the Springfield golf course. I am also aghast at the proposal for an almost 10% increase in rates while no maintanence is done to existing infrastructure. I have no confidence in the current councils ability to effectively manage the affairs of Rotorua.

Further feedback on Community Safety: Again, safer communities are not a sole RLC responsibility and should not be funded with rates - this should come from Central Governement agencies (NZPF, Dept of Welfare etc) what you could do is rezone the likes of the court and wINZ buildings out of t

---

Utu me ngā Hāmene - Fees and Charges *- We are proposing to increase fees and charges in a number of council services to move the burden away from the general rate payer towards the individual directly receiving the service.*

Which options for fees & charges do you support? E aua - Not sure

Further feedback on Fees and Charges: My answer is not "not sure" but no to either option 1 or 2 instead get rid of the high paying middle layer of staff that work on the "pretty jobs" getting paid $80k+, halve your PR staff and rid the council of the cafe and catering costs. Parking is abism

---

Ō Reiti - Your Rates *- The uniform annual general charge (UAGC) is the fixed portion of rates that every ratepayer pays regardless of property value.*

Which option for the change in UAGC do you support? Kōwhiri Tuatoru, Kāore he panoni - Option 3, Status Quo

Further feedback on the UAGC and Rates: Rates do not need to rise and I don't think we need to reduce rates for anyone - Middle income workers are often targeted but the reality is we do not

have spare cash in our pockets and receive no assistance. Leave rates alone and focus on where you, the Council, can spare some fat.

Further feedback on the Long Term Plan:

To be clear my views in this submission are mine as a private citizen of this community, I pay rates via my mother in law. My views are mine and mine alone as a ratepayer ONLY. In my professional capacity I am indifferent to RLC and it's members. For a long time your accounts dept have dictated to the 3 waters group how much they can spend on proactive and reactive maintenance on infrastrcture. Instead of saving for known required upgrades you as a council have opted to run on the smell of an oily rag until the crap has literally hit the fan and now you use it as an excuse to increase rates or contract responsibility out. I have no faith in this Council acting in it's ratepayers best interests at all. Your idea of seeking public feedback through submissions is a joke, case in point the fact the Trility staff were at the WWTP atleast 18 months before the contract was signed. The Sir Howard Morrison rebuild is a waste of money and so is the structure at the entrance to our city. The very public spats between the mayor and the other elected members is a disgrace not to mention the money spent in defending or persecuting each other. RLC appears to be a vindictive, egotistical and finger pointing council and can only be likened to the Emperor has no clothes fable. I hope once Tauranga has finished with the Commissioners they travel over here to sort this lot out. In the meantime you should be investing in 3 waters (do not contract out Trade Waste to Hamilton, that is the stupidest idea), solid waste, building consents, RMA monitoring and animal control.

Which option do you support? Kōwhiri Tuatoru, Whakapai nui, te utu = $28.3 Million - Option 3, Full Master Plan, cost = $28.3 Million

Further feedback on the Aquatic Centre: Physical activity is a key determinant of health and wellbeing so the cost of admission to the aquatic centre should remain as low as possible so that it is accessible to all members of the community.Physical activity is a key determinant of health and wellbeing so the cost of admission to the aquatic centre should remain as low as possible so that it is accessible to all members of the community.

Whakahaumaru Hapori - Community Safety *- Council has a Draft Community Safety Plan that needs support.*

Which options to fund and deliver work to improve community safety do you support? Kōwhiri Tuarua, Hanga he mahere whakahaumaru hapori ā ka timata te whakatinana i ngā kaupapa o te mahere - Option 2, Create a community safety plan and commence delivery of initiatives

Further feedback on Community Safety: I support putting more funding toward community resilience programmes (particularly focused on children, youth and parenting), and toward housing, employment, and education. Te Arawa should be empowered and funded to generate their own programmes and inte

---

Utu me ngā Hāmene - Fees and Charges *- We are proposing to increase fees and charges in a number of council services to move the burden away from the general rate payer towards the individual directly receiving the service.*

Which options for fees & charges do you support? Kōwhiri Tuarua, Panoni/whakapiki rānei ngā utu me ngā hāmene - Option 2, Adjust/increase fees and charges

Further feedback on Fees and Charges:

Ō Reiti - Your Rates *- The uniform annual general charge (UAGC) is the fixed portion of rates that every ratepayer pays regardless of property value.*

Which option for the change in UAGC do you support? Kōwhiri Tuarua, Whakaheke ki te $400 ($75.00 te rahi o te hekenga) - Option 2, Reduce to $400.00 (decrease of $75.00)

Further feedback on the UAGC and Rates: High wealth inequality within a community has a negative effect on community wellbeing and cohesion, therefore I support any intervention that shifts costs away from those who can least afford it toward those with greater wealth.

Further feedback on the Long Term Plan:

Regarding the Homes and Thriving Communities Strategy:

Healthy housing (warm, dry, adequate size to prevent overcrowding) is a key determinant of health and wellbeing for a community. I support all initiatives that increase the accessibility of affordable healthy housing for those that are less well-off in our community. Fast tracking consenting for initiation of social housing – Kainga Ora - will be an important part of that.

I support district plan reviews to allow infill housing. A more compact city (rather than a sprawling city) supports active transport (walking and cycling) - an important part of climate change mitigation.

Regarding the Draft Economic Strategy:

I support efforts to promote our city as the first bilingual city, and support investment in Maori-led economic development as well as partnership with Iwi. I support continued emphasis on 'Wood First' in development and infrastructure.

Regarding the Climate Change Action Plan:

I support climate action that has health co-benefits such as - building warm dry housing, active transport (walking and biking) infrastructure, and moving away from fossil fuels (e.g. hybrid/electric buses for public transport). I support the use of planting/vegetation to capture and filter storm-water from heavy rainfall (as it has the added advantage of carbon sequestration).

Further feedback on Fees and Charges: I think a rates increase that big is just absolutely criminal. You've got alot of people who have lost jobs or had hours reduced, businesses that are struggling and then you want to increase rates its unfair. You made it SO hard to actually access things

---

Ō Reiti - Your Rates *- The uniform annual general charge (UAGC) is the fixed portion of rates that every ratepayer pays regardless of property value.*

Which option for the change in UAGC do you support? E aua - Not sure

Further feedback on the UAGC and Rates: Personally I think our rates are alot especially for what we get out of it, which is a very shabby looking town im afraid to say.

Further feedback on the Long Term Plan:

This part i was extremely suprised about that the sports hub / Springfield golf course looks to go ahead which is so extremely dissapointing I think we need to keep those big green spaces with their large established trees, I spend ALOT of time at the sports fields and hockey, netball and alot of the time theres less than 20 people there unless its a Saturday, theres also the hardly used velodrome. It seems like a vanity project. I also have concerns over increased housing etc adding more pressure to the area.

Which brings me to infrastructure -

Currently our infrastructure is failing due to the fact it wasn't designed for every 2nd section to be subdivided and every third house renovated with added bathrooms etc alot of our infrastructure none of that was taken into account when it was put in, with all the ne proposed subdivisions especially on the hills with Paul sumners land and the hunts taking away that amount of permeable surface area without not only good stormwater systems put in place but also the entire pukehangi Sunnybrook area is going to need upgrading as even now its playing Russian roulette with those areas, and will cause extensive damage to people's properties even loss of properties, the stream behind Edward Payton Grove that flows through to Edmund rd rises extremely fast when there is rain on the hills I have previously raised my concerns about this when it flooded right up to our house on Edward Payton Grove (happy to provide photos again) hamon place is already a very low lying area, growing up in this area it was always a very wet area as it was without houses.

Homedale/gem Street is already prone to flooding.

Sunset road between rimuvale and pandora is prone to flooding , Diana place floods

All these areas already have alot of run off from the hills through the creeks and streams.

Loss of that land mass where water can absorb is critical you plan for this properly.

Use LOCAL planners.

We deal with alot of planners from out of town with our business and they have no clue of the geography or topography of the area

Rushing through the process to get more houses built is not the answer especially when none of this will be affordable housing at all, even the mount view green is hardly affordable properties to alot of people "starting at 649,000 !! For a 3 bedroom " and the new collie drive section only starting at 300k+

Every single road into town is currently ripped up,

Lakefront is making good progress but another not planned properly - its now difficult to access for our elderly alot who would enjoy driving down and sitting on the waterfront.

The playground is NOT disability friendly.

There will be no wheelchair swing, but I was told will be a nest swing - big planing fail there as alot of children in wheelchairs can't be removed from them easily due to feeding tubes, monitors, tube

wires belts etc plus alot are a dead weight so caregivers wouldn't be able to lift them into a nest swing.

Hugely hugely dissapointing. In a time when we should be moving forward as a community and being all for inclusion our elderly and disabled clearly have taken a back seat to any consideration.

And again you need better planners.

Any playground planner would know the importance of a wheelchair swing over a nest swing, clearly yours didn't.

My nephew is in a wheelchair and can't be taken out of it.

My daughter is also disabled so will just have to wait and see how she gos i guess .

Seems all consideration of others has just gone out the wind it makes me really really sad as someone who was born raised and is raising my kids here, at the moment its not a nice place, everywhere looks shabby, temporary fencing and cones everywhere

Whakahaumaru Hapori - Community Safety *- Council has a Draft Community Safety Plan that needs support.*

Which options to fund and deliver work to improve community safety do you support? E aua - Not sure

Further feedback on Community Safety: Ridiculous. Address the root cause. All solutions above are treating symptoms. I am unsure of the root cause but ask the question - why do places like Hamilton not require this level of security in the city? What makes us different?

Utu me ngā Hāmene - Fees and Charges *- We are proposing to increase fees and charges in a number of council services to move the burden away from the general rate payer towards the individual directly receiving the service.*

Which options for fees & charges do you support? E aua - Not sure

Further feedback on Fees and Charges: I do not understand the justification for either. If you are contracting out the services and you cannot properly negotiate with them then that is a problem owned by the council. If this is not the case and negotiations are, in fact, strong, then perhaps

---

Ō Reiti - Your Rates *- The uniform annual general charge (UAGC) is the fixed portion of rates that every ratepayer pays regardless of property value.*

Which option for the change in UAGC do you support? Kōwhiri Tuarua, Whakaheke ki te $400 ($75.00 te rahi o te hekenga) - Option 2, Reduce to $400.00 (decrease of $75.00)

Further feedback on the UAGC and Rates: I thought this is how the rates were based. A charge based on the value of the property. Typically if a property is valued at a higher price the property is

larger or requires council intervention on a more regular and serious basis. It would, then, make sense to charge out proportionally to this.

Further feedback on the Long Term Plan:

I've lived here for three years and have not seen much movement whatsoever from the council on any front other than putting some security guards around the place, filling up homes/hotels with homeless, and mopping up an overpriced sculpture.

I think the lakefront development, on the other hand, is a great idea. However the execution of this project, as well as that of other roading projects, has been unbelievably poor. Timelines are either incredibly drawn out or are not, in any way, adhered to, with no repercussion for lax services from contractors.

Further feedback on the UAGC and Rates: Why should we (farming ratepayers) have any increase in our rates when we do not even receive the level of service (for rural roads) that we already pay for? We live in Paradise Valley Road, and the road verges have not been mowed since last October, and along much of the length of the road there are weeds over a meter tall, within 1 meter of the edge of the tar seal, and lots of blackberry encroaching onto the road which gets 'pruned' by passing traffic running over it. Many of the reflective road edge markers are not visible because of the weeds. I walk the road often (for exercise) and the gorse/broom/blackberry and other weeds makes it difficult to get off the road when traffic passes, raising the question of safety for pedestrians? Also, since moving here 15 months ago, there has been zero maintenance done on any of the roadside gutters, and in many places the gutters do not allow rain water to flow along and enter culverts -it flows across the road, causing more safety issues. I have also had several phone conversations with Council staff asking if we can have 'recommended speed' signs installed for sharper bends, as this road is also used by a lot of tourist traffic, or at least have some chevron

arrows installed. Council staff say it's not required - again an ignored safety issue! I also asked if some 'reminder' 70km/hr speed signs can be installed as all of Paradise Valley Road is 70km/hr. Again I was told 'no', yet there are similar reminder signs along the 70km/hr section of Pukehangi Road. Is this a question of 'double standards' - pandering to the urban residents while ignoring the rural residents. Who at Council is not doing their job and checking that the contractor has completed road maintenance work to the required quality?

Te Whare Kauhoe - Aquatic Centre *- Council is asking the community how much they want to spend on upgrading the Aquatic Centre to ensure it is a fit-for-purpose, shared public facility.*

Which option do you support? Kōwhiri Tuatoru, Whakapai nui, te utu = $28.3 Million - Option 3, Full Master Plan, cost = $28.3 Million

Further feedback on the Aquatic Centre: A good option, but only if the addition to my rates is only what the document states. That means there is no room for the Council's history of "Smoke and Mirrors."A good option, but only if the addition to my rates is only what the document states. That means there is no room for the Council's history of "Smoke and Mirrors."

Whakahaumaru Hapori - Community Safety *- Council has a Draft Community Safety Plan that needs support.*

Which options to fund and deliver work to improve community safety do you support? Kōwhiri Tuatahi, Hanga he mahere whakahaumaru hapori hei whakatinana - Option 1, Create a community safety plan for implementation

Further feedback on Community Safety: Again my preferred option, but only if the rates influence is only what is stated in the document.

Utu me ngā Hāmene - Fees and Charges *- We are proposing to increase fees and charges in a number of council services to move the burden away from the general rate payer towards the individual directly receiving the service.*

Which options for fees & charges do you support? Kōwhiri Tuarua, Panoni/whakapiki rānei ngā utu me ngā hāmene - Option 2, Adjust/increase fees and charges

Further feedback on Fees and Charges: Definitely prefer a user pays basis.

Ō Reiti - Your Rates *- The uniform annual general charge (UAGC) is the fixed portion of rates that every ratepayer pays regardless of property value.*

Which option for the change in UAGC do you support? Kōwhiri Tuatahi, Whakaheke i te UAGC mai te $475.00 ki te $425.00 ($50.00 te rahi o te hekenga) - Option 1, Reduce the UAGC from $475.00 to $425.00 (decrease of $50.00)

Further feedback on the UAGC and Rates: Prefer this option.

Further feedback on the Long Term Plan:

The proposals in the document look reasonably sound, however this Council has a record of using "Smoke and Mirrors" and this will be the second time in recent years that the so called average Rates increase is not what mine will be and I will be out for considerably more. This is misleading and I struggle to understand how the extremely expensively valued properties have the lowest residential Rates increases and the "poor farmers" get a reduction! My own Rates have effectively doubled in 25 years and are already unaffordable. I found a 9.2% increase appalling and now I see that it will again be much higher. More Smoke and Mirrors). My other concern is that I once voted for our current Mayor on a platform of a Zero Rates increase which I am still waiting for, or does that mean that "Due Diligence" is not considered important anymore? Finally I believe that Council have irresponsibly spent millions of dollars of Rate Payers money on a variety, of what can only be described as "vanity projects" at the expense of infrastructure maintenance and improvements. What guarantees do we have that such frivolous expenditure is not going to continue in the future?

Further feedback on the Aquatic Centre: The Aquatic Centreis a great resource for the community but needs to have better accessibility in terms of pool access and changing facilities for people with disabilities and mobility challenges. We have a great resource of thermal water in Rotorua which is under-utilised.

Modern facilities which reflect the society we live in -changing areas that are not gendered, safe and dignified for all users.

Remove barriers for people to enjoy the possibilities of water based movement and exercise.

Also, the current pool often just feels grotty - we can do better!The Aquatic Centreis a great resource for the community but needs to have better accessibility in terms of pool access and changing facilities for people with disabilities and mobility challenges. Which option for the change in UAGC do you support? Kōwhiri Tuatoru, Kāore he panoni - Option 3, Status Quo

Further feedback on the UAGC and Rates: Stop tinkering

Further feedback on the Long Term Plan:

Please provide value to ratepayers by prioritising core infrastructural requirements and borrow to fund the Tarawera Sewerage Scheme. The Council's intended approach is particularly harsh and unfair relative to its approach to previous schemes. Attached is a letter that was sent by my partner on behalf of Te Mu Road residents in response to Council's recent communication to Lake Tarawera ratepayers. This explains our position in more detail.

Reduce funding and resourcing of the homes and thriving communities strategy to fund necessary infrastructure, for which Council has an obligation to provide.

Do not waste ratepayer money on setting up another CCO. Provide InfraCore with 5 year contracts for the core work they currently undertake and then put that business up for sale. It is the only way to get that area of Council performing effectively.

Do not spend any additional money on a climate change action plan that cannot be prepared at a fundamental level, and the sharing of similar information from peer Councils, by existing managers.

Council has developed a culture of deferring to and relying on consulting advice. In many cases it has well paid and supposedly knowledgeable managers who should be doing the mahi and having the accountability.

I support the majority of projects and initiatives that Council has proposed and already commenced to position Rotorua better in the post-Covid years ahead. It makes sense to me to undertake good projects that are eligible for matching government funding. Through my role at Council I take pride in helping to deliver great value projects to our community.

Te Whare Kauhoe - Aquatic Centre *- Council is asking the community how much they want to spend on upgrading the Aquatic Centre to ensure it is a fit-for-purpose, shared public facility.*

Which option do you support? Kōwhiri Tuatahi, Whakatika, te utu = $8 Million - Option 1, Repair, cost = $8 Million

Further feedback on the Aquatic Centre: The centre attracts 350,000 visitors a year and that is nothing to frown at. A refresh will go a long way to making sure the centre continues to attract people. But Rotorua's jewel is our lakes. People do not visit Rotorua to swim at the Aquatic Centre which is why I support the bare minimum option. I believe this will still achieve a facility the community is proud to visit, to learn to swim, to have fun and to enjoy being active at.

The centre attracts 350,000 visitors a year and that is nothing to frown at. A refresh will go a long way to making sure the centre continues to attract people. But Rotorua's jewel is our lakes. Further feedback on Community Safety: I support option 2. Ensuring our community is safe is one of the most important things. Perceptions of a safe and welcoming place to visit will go someway to revitalising our cbd and encouraging tourists to visit. Far more so than a fancy aquatic centre.

Utu me ngā Hāmene - Fees and Charges *- We are proposing to increase fees and charges in a number of council services to move the burden away from the general rate payer towards the individual directly receiving the service.*

Which options for fees & charges do you support? Kōwhiri Tuarua, Panoni/whakapiki rānei ngā utu me ngā hāmene - Option 2, Adjust/increase fees and charges

Further feedback on Fees and Charges: Anything to keep rates down (and to the projections in the 2018-28 long term plan) are to be supported

---

Ō Reiti - Your Rates *- The uniform annual general charge (UAGC) is the fixed portion of rates that every ratepayer pays regardless of property value.*

Which option for the change in UAGC do you support? E aua - Not sure

Further feedback on the UAGC and Rates: I'm unsure which to support. In theory option 1 sounds good, but as long as this is not a tool to increase rates in other areas

---

Further feedback on the Long Term Plan:

It is disappointing there is no section in this feedback form to provide feedback on proposed rates rises, separate to the UAGC. Proposed rates increases for 2021 in the previous LTP were to be limited to 3.03 per cent. To see a proposed average increase of more than 9 per cent is a kick in the guts.

Forecasted debt was also predicted to be no higher than $300m by 2028 in the previous LTP and now we are looking at reaching $400m by 2024. While I acknowledge this relates to a debt to revenue ratio, I believe the council should be doing everything it can to keep debt and rates down in today's unpredictable climate. If that means cutting its cloth when it comes to things like the aquatic centre, so be it.

We are being told an average annual rates increase of 3.8% is forecast for the following nine years. But I and other ratepayers take this with a grain of salt given we were promised 3.03 per cent at the last LTP and are being hit with three times that.

I only hope pleas for reasonable rates and debt are heard.

Further feedback on the UAGC and Rates:

Further feedback on the Long Term Plan:

As far as community saferty for Mamamu it needs more footpaths along streets off South Road & South Rd up to Tawhero St.

Rotorua safety needs to be addressed more by Police not Council funding.

I am pushing for the last 4km of South Rd to be tar sealed. I have already put in a petition in from South Rd residents to be told its not a priority. What does it take - a fatality which will happen one day judging by the amount of accidents on it already. The seal ends right on a corner which is ridiculous.

I do not think there is much advantage for home owners by lowering UAGC as with increased property valuation it will catch them at the other end. I think owners of property would be happier if rates were spent more wisely - on infrastructure etc things that benefit the ratepayer. The lakefront was fine as it was and we certainly didn't need the Hemo sculpture. I think it was just something to remind us how badly Chadwick spent our rates.

Further feedback on the Aquatic Centre: Rotorua is nationwide famous for its lakes (unfortunately not Lake Rotorua itself) not for the Aquatic Centre. You never heard someone saying "Oh I'm going to Rotorua to visit the pools!!" Visitors or locals use Okareka, Tikitapu and Tarawera much more than the Aquatic Centre. I do agree our pools need improvements but putting all the aquatic recreation in Te Whare Kauhoe is completely out of reality. Why instead of investing almost $30million to improve pools, the council uses $10million to build recreational infrastructure on the lakes? Why instead of building a bombing pool the council instead build a jumping platform on Blue Lake or Okareka which can bring big festivals like Flochella or Red Bull Cliff Diving? It's far from reasonable focusing on Aquatic Centre only. Investing on our lakes enable the government to create jobs (lifeguards.....) and still spend money creating construction opportunities.Rotorua is nationwide famous for its lakes (unfortunately not Lake Rotorua itself) not for the Aquatic Centre. What about the iconic Blue baths they haven't been open for swimming in quite a while. On enquiry I was told they are uneconomical and won't be opening in the near future. I feel strongly about this subject and would like to see them open again soon. With tourists numbers increasing the income

generated from these pools would hopefully become viable again. I feel the reason for the pool not making money is poor advertising and marketing on the behalf of the current operators. There only interest was the venue catering for weddings etc. please don’t let another iconic Rotorua attraction go by the wayside

Which option do you support? Kōwhiri Tuatahi, Whakatika, te utu = $8 Million - Option 1, Repair, cost = $8 Million

Further feedback on the Aquatic Centre: Due to COVID, Rotorua is in economic harsh times and until we can bounce back plans should be minimal. Protect and maintain existing amenities such as the aquatic centre and delay grandiose plans.Due to COVID, Rotorua is in economic harsh times and until we can bounce back plans should be minimal. Protect and maintain existing amenities such as the aquatic centre and delay grandiose plans.

Whakahaumaru Hapori - Community Safety *- Council has a Draft Community Safety Plan that needs support.*

Which options to fund and deliver work to improve community safety do you support? Kōwhiri Tuarua, Hanga he mahere whakahaumaru hapori ā ka timata te whakatinana i ngā kaupapa o te mahere - Option 2, Create a community safety plan and commence delivery of initiatives

Further feedback on Community Safety: There's no point in creating a plan and not implementing it. Community safety is very important and should be very high on the council's list.

Utu me ngā Hāmene - Fees and Charges *- We are proposing to increase fees and charges in a number of council services to move the burden away from the general rate payer towards the individual directly receiving the service.*

Which options for fees & charges do you support? Kōwhiri Tuarua, Panoni/whakapiki rānei ngā utu me ngā hāmene - Option 2, Adjust/increase fees and charges

Further feedback on Fees and Charges: It should be user pays. Increasing rates should be the last option council should use. Any increase will put households into greater financial burden and will only add to the number of homeless as prices are passed on by landlords.

Ō Reiti - Your Rates *- The uniform annual general charge (UAGC) is the fixed portion of rates that every ratepayer pays regardless of property value.*

Which option for the change in UAGC do you support? Kōwhiri Tuatoru, Kāore he panoni - Option 3, Status Quo

Further feedback on the UAGC and Rates: There should be no change in the rates. This seems to be an underhand way of moving rates increases around. There is no spare money in Rotorua households probably for the next few years. Once our economy is buoyant then increases should be looked at as the last option.

Further feedback on the Long Term Plan:

I'm horrified that the council wish to slap massive rates increases on Rotorua residents. These are tough financial times and we need the council to be prudent and ensure spending is minimal. Core infrastructure should be maintained and grandiose projects such as the Aquatic centre and Westbrook sports precinct should be shelved or at least delayed. We have a beautiful city and I love living here but rates are now the second biggest cost in our household after food. I can scrimp on my grocery shop but the council continues to increase rates and the burden it puts on our household. Any rates increase should be in line with the cost of living, under 3% and even that will add to the financial burden. When I shop I use my budget. How much do I have and how to spend it. The council should do likewise.

Further feedback on the Long Term Plan:

Stop increasing rates and use the money already raised from rates to fund things appropriately rather that tossing money towards areas the residents and ratepayers don't want messed with! The

council always seem blind and deaf to what the city actually want and always go ahead with their own plans regardless of public outcry.

For additional consideration, actually care about the environment instead of pretending to and leave the Springfield golf course alone! Upgrade the facilities we already have!

Further feedback on Fees and Charges: Use pays as far as I'm concerned.

Ō Reiti - Your Rates *- The uniform annual general charge (UAGC) is the fixed portion of rates that every ratepayer pays regardless of property value.*

Which option for the change in UAGC do you support? E aua - Not sure

Further feedback on the UAGC and Rates: I don't understand the question but in my opinion, rates needs to be based on the socio-economic status of communities. Many of our lakeside Maori villages

for example are Decile 10 in terms of levels of poverty. And yet our properties are rated based on their proximity to lakefronts and the city. This is unacceptable and needs to change. Equality, equity, the Fenton Agreement and Treaty of Waitangi need to be part of the rates discussion and decision-making.

Further feedback on the Long Term Plan:

How ridiculous expecting people to read three strategies and one climate change plan before giving feedback here. Who makes these stupid decisions! They need to be removed from management and replaced by people with realistic expectations of consultation and actual strategies for community engagement that work.

Name/Oragnisation: Patricia Hosking

Which option for the change in UAGC do you support?

Further feedback on the UAGC and Rates:

Further feedback on the Long Term Plan:

Rotorua Lakes Council your Long Term Plan is a disgrace. Please bin it and start again. Declare a climate emergency, don't increase our rates, stop wasting our money and stop spending it on international tourism. Stop spending our money on an tourism industry that has taken nearly 1000 houses out of the rental market and has left nearly 1000 families homeless. Stop spending on an industry that is reliant on rich environment, climate wrecking tourists and international air travel and climate changing emissions that are destroying our futures. Climate change emissions from air travel must stop. The UN Secretary General Antonio Gortarez warned the planet is on the verge of an abyss. He says the world needs to turn around climate changing emissions now or face a dire future. You must stop calling international tourism sustainable and you must stop promoting it. You must encourage Rotorua's international tourist dependent businesses to move away from their dependence on international tourism and promote sustainable businesses that employ local people and pay liveable wages instead. Climate change is destroying our environment, our wildlife and their habitats and our ability to grow food. It is increasing poverty, temperatures, droughts, starvation, floods, fires, causing sea level rise which is destroying our coastal cities and beaches. Heat waves are killing more people than all other natural hazards combined and extreme weather events are destroying our infrastructure. Scientists say “The only solution to global warming is to reduce the amount of carbon dioxide in the atmosphere. This can only be done by some combination of two things – stop burning fossil fuels which continue to add to the level of carbon dioxide in the atmosphere and oceans and remove most of the extra carbon dioxide we have put in.” That means you must stop building information centres and cafes and communication centres and more mountain biking infrastructure for international tourists. Stop building an industrial park at the airport and investing in an unsustainable industry. Stop increasing climate change emissions and start protecting the environment and our children's futures. Start planting green infrastructure and start protecting our urban streams from floods and pollution, start planting up streams and recreating wetlands, start replacing old sewage pipes and stormwater pipes and start supporting developers to build inner city climate safe apartments instead of “hot boxes” and start ensuring all new buildings have light-coloured roofs which reflect heat, and don't absorb it, and start requiring all new housing to have water storage and solar power. And stop building houses on flood prone land.

Don't establish a Property Development CCO and don't get involved in the property market and don't sell our parks and reserves to build houses on them to fund your tourist driven projects.

Don't increase staff numbers and salaries which you cannot justify and haven't earned. Do take a pay cut instead. Your salaries are out of touch with reality.

Don't waste ratepayer money on projects we don't want and can't afford.

Start consulting with the whole of Rotorua and stop consulting with the people you have been consulting with when you developed this LTP. Start consulting low income people, people on fixed

incomes, people who are unemployed, women who lost jobs due to the pandemic, ask women with children, people who have been bankrupted, whose businesses are failing, whose costs have increased and are continuing to increase, ask people who are struggling to pay the bills, who have not had wage increases and who have had their working hours cut, ask people who are struggling to feed their families. Did you consult with people who don't have a home? Their rents have increased and will increase again if you increase their landlords rates. Why not talk to all of them and all of us before you devise another ”transformational” LTP that is turning Rotorua into a city known for its homeless, poverty and crime?

Stop having public-excluded meetings and stop making public-excluded decisions. Stop having sham consultations with Rotorua people, stop treating us with disrespect and stop wasting our time. Open up your meetings to the public. Let us hear why you are making Rotorua people more impoverished and why you are increasing inequality and why you are causing social harm and worsening crime and increasing homelessness so you can could spend more on building assets for international tourism. You are crippling our economy, promoting the destruction of our environment and your climate change emissions and climate wrecking rich tourists are plummeting us towards an apocalypse.

The United Nations’ World Food Programme warns of a “looming catastrophe” with about 34 million people globally on the brink of famine. The group has cited climate change as a major factor contributing to the sharp increase in hunger around the world. Food inflation is also on the rise as farmers deal with the impact of extreme weather at a time of robust demand"

That is what your leadership is doing. Your need to stop the increase in carbon dioxide but instead you are intent on increasing emissions for the next ten years. We don't have ten years left to turn climate change around.

Let us hear why you think your Long Term Plan should take priority over ours and our children's futures. Please open yourselves up to public scrutiny. Open up your council meetings to the public. You could even declare a climate emergency.

Te Whare Kauhoe - Aquatic Centre *- Council is asking the community how much they want to spend on upgrading the Aquatic Centre to ensure it is a fit-for-purpose, shared public facility.*

Which option do you support? Kōwhiri Tuatahi, Whakatika, te utu = $8 Million - Option 1, Repair, cost = $8 Million

Further feedback on the Aquatic Centre: Not everyone uses it, it should be user pays, increase the entrance fee. We certainly living out at Lake Rotoma do not use it and should not have to contribute.Not everyone uses it, it should be user pays, increase the entrance fee. We certainly living out at Lake Rotoma do not use it and should not have to contribute.

Whakahaumaru Hapori - Community Safety *- Council has a Draft Community Safety Plan that needs support.*

Which options to fund and deliver work to improve community safety do you support? Kōwhiri Tuatoru, Me whakatinana i tētahi mahere whakahaumaru hapori, kāore anō he pūtea e tāpae ana - Option 3, Adopt a community safety plan with no further financial contribution

Further feedback on Community Safety: The people seem to be the ones keeping the community safe in our area as we are not urban, often at their own cost, so I am not prepared to pay the council for this.

Utu me ngā Hāmene - Fees and Charges *- We are proposing to increase fees and charges in a number of council services to move the burden away from the general rate payer towards the individual directly receiving the service.*

Which options for fees & charges do you support? Kōwhiri Tuarua, Panoni/whakapiki rānei ngā utu me ngā hāmene - Option 2, Adjust/increase fees and charges

Further feedback on Fees and Charges: User pays for these services, not every rate payer. I have dogs and even though we do not have ANY services in our area, its my choice to own them and am happy to pay for them.

Ō Reiti - Your Rates *- The uniform annual general charge (UAGC) is the fixed portion of rates that every ratepayer pays regardless of property value.*

Which option for the change in UAGC do you support? Kōwhiri Tuarua, Whakaheke ki te $400 ($75.00 te rahi o te hekenga) - Option 2, Reduce to $400.00 (decrease of $75.00)

Further feedback on the UAGC and Rates: Capital value- ore expensive properties should pay more, they are bigger and use more space and services.

Further feedback on the Long Term Plan:

I am very concerned about the proposed increase to Rotorua Rural of 16% to rates. We do not have the same services available to us and apart from lifestyle blocks and farms most dwellings are meagre in comparison to the urban areas. We pay for water used, yes our rubbish/recycling is collected but other than that we have no footpaths, NZTA manages the road as its a SH, no football fields or dog parks, no public pools and the like. We have just been hit with the new step tank system for sewerage with no indication of the cost to us personally, an increase in rates is unacceptable.

Further feedback on the Long Term Plan:

Rotorua Lakes Council, your Long Term Plan is a disgrace. Please bin it and start again. Declare a climate emergency, don't increase our rates, stop wasting our money and stop spending it on international tourism.

Stop spending our money on a tourism industry that has taken nearly 1000 houses out of the rental market and has left nearly 1000 families homeless. Stop spending it on an industry that is dependent on rich environment, climate wrecking tourists and international air travel and increasing climate changing emissions that are destroying our futures.

Climate change emissions from air travel must stop. The UN Secretary General Antonio Gorterres warned the planet is on the verge of an abyss. He says the world needs to turn around climate changing emissions now or face a dire future.

You RLC must stop calling international tourism sustainable and you must stop promoting it. You must encourage Rotoruas international tourism businesses to move away from international tourism and promote sustainable businesses that employ local people and pay livable wages instead. Climate change is destroying our environment, our wildlife and their habitats and our ability to grow food. It is increasing poverty, temperatures, droughts, starvation, floods, fires, causing sea level rise which is destroying our coastal cities and beaches. Heat waves are killing more people than all other natural hazards combined and extreme weather events are destroying our infrastructure. Scientists say “The only solution to global warming is to reduce the amount of carbon dioxide in the atmosphere. This can only be done by some combination of two things – stop burning fossil fuels which continue to add to the level of carbon dioxide in the atmosphere and oceans and remove most of the extra carbon dioxide we have put in.”: RLC, that means you must stop building information centers and cafes and communication centers and more mountain biking infrastructure for international tourists. Stop building an industrial park at the airport and investing in an unsustainable industry. Stop increasing climate change emissions and start protecting the environment and our children's futures. Start planting green infrastructure and start protecting our urban streams from floods and pollution, start planting up streams and recreating wetlands, start replacing old sewage pipes and stormwater pipes and start supporting developers to build inner city climate safe apartments instead of “hot boxes”. Start ensuring all new buildings have light coloured roofs which reflect heat, and don't absorb it, and start requiring them to have water storage and solar power. And stop building houses on flood prone land.

Don't establish a Property Development CCO and don't get involved in the property market and don't sell our parks and reserves to build houses on them to fund your tourist driven projects.

Don't increase staff numbers and don't increase salaries by $1million a year for the next ten years. Do take a pay cut instead. Your salaries are out of touch with reality.

Don't waste ratepayer money on projects we don't want and can't afford and which you did not not consult us on.

Start consulting with the whole of Rotorua and stop consulting with the people you have been consulting with when you developed this LTP. Start consulting low income people, people on fixed incomes, people who are unemployed, women who lost jobs due to the pandemic, ask women with children, people who have been bankrupted, whose businesses are failing, whose costs have increased and are continuing to increase, ask people who are struggling to pay the bills, who have not had wage increases and who have had their working hours cut, ask people who are struggling to feed their families. Did you consult with people who don't have a home? Their rents have increased and will increase again if you increase their landlords rates. Why not talk to all of them and all of us before you devise another"transformational" LTP that is turning Rotorua into a city known for its homeless, poverty and crime?

Stop having public-excluded meetings and stop making public-excluded decisions. Stop having sham consultations with Rotorua people, stop treating us with disrespect and stop wasting our time. Open up your meetings to the public. Let us hear why you are making Rotorua people more impoverished and why you are increasing inequality and why you are causing social harm and worsening crime and increasing homelessness so you can could spend more on building assets for international tourism. You are crippling our economy, promoting the destruction of our environment and your climate change emissions and climate wrecking rich tourists are plummeting us towards an apocalypse.

The United Nations' World Food Programme warns of a "looming catastrophe" with about 34 million people globally on the brink of famine. The group has cited climate change as a major factor contributing to the sharp increase in hunger around the world. Food inflation is also on the rise as farmers deal with the impact of extreme weather at a time of robust demand"

That is what your leadership is doing. Your need to stop the increase in carbon dioxide but instead you are intent on increasing emissions.

Let us hear why you think your plans should take priority over ours and our children's futures. Please open yourselves up to public scrutiny. Open up your council meetings to the public. You could even declare a climate emergency.

Further feedback on the Aquatic Centre: It is obvious that the Aquatic Centre needs the upgrades that you suggest. It is not a facility that our city can be proud of, and I seriously doubt that it can safely meet the demands of our community going forward.

I understand from your LTP consultation document, that if external funding of some $10.43 million is not found you may consider scaling back or delaying the project.

Do not do this. I am so of the opinion that the entire project should be done, now, that the ratepayers need for once to bite the bullet and face up to their responsibilities.

I support Option 3.

---

Ō Reiti - Your Rates *- The uniform annual general charge (UAGC) is the fixed portion of rates that every ratepayer pays regardless of property value.*

Which option for the change in UAGC do you support? Kōwhiri Tuarua, Whakaheke ki te $400 ($75.00 te rahi o te hekenga) - Option 2, Reduce to $400.00 (decrease of $75.00)

Further feedback on the UAGC and Rates: The increase needed in our rates demands is both high and necessary.

It is recognized that under our current Local Body funding system Council has little choice but to use in the main a capital value rating system.

But this will, because of the current exploding value of lower CV housing, put an extra burden on those who are already struggling to make ends meet. The occupiers of lower CV housing will suffer the most. If they are not helped, a rates increase of the size proposed will lead to rates defaults, and an increase in the levels of poverty in our City.

Your Option 2 will lead to a $45 increase in my annual rates demand. I am not a rich man, the pension is my main source of income, but I do have the luxury of owning my own home. $45 is about 10 cups of coffee throughout the year, I should give them up instead.

Further feedback on the Long Term Plan:

Could I take this time to explain my opposition to the possible 3 Waters reform.

I am told by you that there are infrastructure problems existing in our City that must be resolved. But I also feel, that in comparison to many other towns and cities, you are doing pretty well in looking after our own 3 waters. So I feel that we do not need the big stick that Government is hitting us with when it is other Councils who have created the problem and deserve the big stick.

As things are today, I would prefer that the management of our water be left with us, and in our local control.

Inevitably, if our 3 Waters are included in a "Regional" scheme, we will end up a poor 3rd cousin. We can have no faith in a regional scheme in the Bay of Plenty, let alone one that will include the mighty Waikato. The evidence is clear.

To quote a few examples:

Tauranga said no to our Airport, No to the Velodrome, stole our Polytech and when a Regional cash disbursement from our Quayside company was made a few years back gave $20 million to Tauranga and 2 to us. We can have no confidence in a "Regional" example if the BOP Regional Council model is used as an example. Even it's representative structure is flawed, with it being stacked with Councilors from Tauranga and Western Bay. We have but two lonely souls.

The BOP Regional Council is subservient to Priority One, a group intent on the prosperity of Tauranga and the Western Bay alone.

There are going to possibly be economic advantages in joining the 3 Waters scheme. Please weigh them carefully against any loss of autonomy

Now to my village. Page 8 has a map showing plan changes to unlock land for development. The purple area that changes industrial to residential in the middle of our village must go ahead.

I note that you also have kept the area on the left of the Main Road and to the Waiteti Stream open as a residential area. This must also be used, it is a prime site for residential development. This area suffered terribly a couple of years back from a concerted attack by NIMBY'S and populist political activities that lead to its development being stopped.

Ngongotaha needs the economic stimulus that these two areas can provide, and Rotorua certainly needs the houses.

Ō Reiti - Your Rates *- The uniform annual general charge (UAGC) is the fixed portion of rates that every ratepayer pays regardless of property value.*

Which option for the change in UAGC do you support? Kōwhiri Tuatahi, Whakaheke i te UAGC mai te $475.00 ki te $425.00 ($50.00 te rahi o te hekenga) - Option 1, Reduce the UAGC from $475.00 to $425.00 (decrease of $50.00)

Further feedback on the UAGC and Rates: The current information being disseminated is not providing the correct information. There is a portion of rates that will go up more than the advertised 9% and ours is in fact going up 23.5% or $634 a year. If the RLC are asking for feedback its important that the information provided is correct. This is about saving $50 for some without to much thought to us that have to pay an additional $634.

Further feedback on the Long Term Plan:

I think the biggest issue is for Rotorua is the infra structure. I am aware of parts of Rotorua that now suffer more flooding that previously, due to increase possibly, in rainfall but also the extending the existing infrastructure which may not be fit for purpose in this day and age. I think we need to look forward to what will be the demand in 10,20 years and start planning now.

I think all the storm water goes through the treatment plant at the moment. Possibly consider re rerouting and improving flow? I think this aspect is going to become critical depending whats happening with some of the developments on the western side of Rotorua.

Further feedback on the UAGC and Rates:

Further feedback on the Long Term Plan:

Houses that are used solely for air bnb should have a greater rates charge, to discourage this and free up housing for rentals. There are enough other accommodation options in Rotorua. Also stop freedom camping, make people use local camping grounds, this supports the local community!!! I

fully support an upgrade but hard to decide on whether to support the $17 or $28 million choice. it would be amazing to add H2O slides and more play arrears - make it a tourist destination as well as a swimming facility. In regards to parking charges, I personally loathe the meter system in Rotorua to the point where I will travel to Tauriko crossing or shop online so I don't have the hasell of parking in town.

Look at chargin out of towners for parking to use our mountain bike facilities. This should be free for residents but a charge for everyone else. This would generate a large amount of revenue.

'- Stop making rates so expensive for whanau and use our money in the right places

- Fix footpaths and playgrounds

- dont buy stupid statues
- Stop increasing council pay rates above what we your employer are being increased by
- Give our youth something to do and somewhere to go. Somewhere they want to be
- make Rotorua attractive to tourists again. open our museum again
- Make using our facilities cheaper for locals, hirage of buildings kills events

I have recently moved in the Rotorua District and with going joining the aquatic center which I attend 3 days per week i noticed with my first visit that this aquatic center is long overdue of a full refurbishment. It was disappointing as I expected better considering Rotorua is on of the most visited tourist locations in nz.

Further feedback on the Aquatic Centre: When i was younger the Aquatics Centre was were i spent most of my time during the school holidays. I loved the water and i loved swimming so i would always drag my whanau along with me. Its looked the same ever since then. They have a little cafe now but a full one would be great. Upgrades to the pool, facilities and fitness area would be awesome. Hydroslide would be great for all the kids as the closest hydroslide is at the AC Baths in Taupo or BayWave in Tauranga. Learning to swim is such a big part of Rotorua culture, with all the lakes and beaches close by. I think this would be a good investment.When i was younger the Aquatics Centre was were i spent most of my time during the school holidays. Further feedback on the UAGC and Rates:

Further feedback on the Long Term Plan:

The EEC was meant to alleviate the lack of indoor basketball courts but is both overly expensive and often taken for other events. In comparison to Tauranga City which has both the old 3-court stadium

and the new 9-court stadium, our sport is poorly served. Our basketball has had to decline entries from schools [pre Covid] despite running competitions Monday through to Friday nights. The Sportsdrome was built in early 1960 and was between 2 and 3 metres short of a fullcourt, it is also now 60 years of age. This alone should be reason for it to be addressed, or build a conference centre and let our kids have 7 courts.

Build those damn houses. Demolish all those opressive golf courses on council lands and build houses on them. Don’t listen to the elite few golfers there are more golf courses in Waikiti Valley and Hamurana that they can use. Don’t listen to the home owners around Springfield and Sophia, their Dinosaur Not In My Backyard mentality is detremental to the growth of Rotorua and their blocking the solution of the housing problem. Their only goal is to continue the shortage of house supply to ensure the value of their homes are protected and ever growing.

Further feedback on the UAGC and Rates:

Further feedback on the Long Term Plan:

We live at lake tarawera with our 3 young children in a small 90sm house. We are disappointed at the council's proposal for the residents to pay in lump sum the lions share of the proposed sewerage

scheme. I'd argue this is basic infrastructure and dont understand why the capital investment is the residents responsibility.

User pays is fair for use and maintenance of the system as it is for all other people who purchase a property but not the capital. We already pay for lakes restoration and enhancement in our considerable rates bill so why hasnt this been accumulated for use?

We pay thousands of dollars in rates and dont really see it being used. We have no footpaths for our children to safely walk along the street, I bike to work on a narrow road with no cycle shoulder, we drop our rubbish off at one convenient location for council pickup, supply and pump our own water and so on, so where is our money going?

The proposal to pay a minimum of double the amount that all others paid at the neighbouring lakes, plus in a lump sum format stinks to be honest.

It seems we are dealing with a perception that we have plenty of money at tarawera and therefore can just pay up.

The reality is that while there are some beautiful houses owned by people with the ability to pay the proposed amount (as at the other lakes) a lot of us are just getting by. There are a number of other single income young families like us also living in old former baches, and a lot of retirees with limited funds and an inability to get a mortgage to pay for this infrastructure project for you.

Being asset rich due to a surge in house pricing nationwide doesnt actually make one cash rich.

Council or government needs to step up and make the situation fair and on a par with the other schemes. Lake Rotoma fell outside the 4 lakes given the large amount of funding, but still got rescued by another grant to assist. Why are we different?

Regards, Julian Gray

Further feedback on Community Safety: I don't trust council to be effective in implementing a community safety plan, I can see a big increase in expenditure with no positive outcomes.

Utu me ngā Hāmene - Fees and Charges *- We are proposing to increase fees and charges in a number of council services to move the burden away from the general rate payer towards the individual directly receiving the service.*

Which options for fees & charges do you support? Kōwhiri Tuarua, Panoni/whakapiki rānei ngā utu me ngā hāmene - Option 2, Adjust/increase fees and charges

Further feedback on Fees and Charges: I'm totally opposed to increasing rates, I have no faith in the current council and feel Rotorua has gone backwards under the current leadership.

Ō Reiti - Your Rates *- The uniform annual general charge (UAGC) is the fixed portion of rates that every ratepayer pays regardless of property value.*

Which option for the change in UAGC do you support? Kōwhiri Tuatahi, Whakaheke i te UAGC mai te $475.00 ki te $425.00 ($50.00 te rahi o te hekenga) - Option 1, Reduce the UAGC from $475.00 to $425.00 (decrease of $50.00)

Further feedback on the UAGC and Rates: I am appalled at the proposed rate increases. Many people will be forced to move away from Rotorua which breaks my heart. The current council are out of touch with the reality of the situation for many people in Rotorua. Where do they think the many retired ratepayers with superannuation as their only source of income are going to find the money for the rate increases.

Further feedback on the Long Term Plan:

I am opposed to increasing the cycle tracks any further at this stage, what a total waste of money the CBD cycle track was, haven't seen anyone use it but have seen the number of businesses close as a result of it. Under the current council basic infrastructure has fallen, roads and footpaths are in poor condition yet they prioritize spending on sculptures and cycleways before basic repairs. I don't want to see any development of the Westbrook Springfield golf course under this current council, any decisions on this should take place after the next council elections. I'm very disappointed in our mayor and most of the councillors, Rotorua deserves better.

Which option for the change in UAGC do you support? Kōwhiri Tuatahi, Whakaheke i te UAGC mai te $475.00 ki te $425.00 ($50.00 te rahi o te hekenga) - Option 1, Reduce the UAGC from $475.00 to $425.00 (decrease of $50.00)

Further feedback on the UAGC and Rates: Capital value is a poor indicator of the demand for council services and I would not wish to see additional burden placed upon the owners of properties in higher value areas on the assumption that they are using more of council's services.

Further feedback on the Long Term Plan:

I submit that spending on infrastructure, environmental enhancement, and future-proofing the city for climate change should be of the highest priority. Excess stormwater is already a problem in several areas and the new Pukehangi subdivision is of particular concern for its effect on the catchment. Water treatment costs are a major issue and I believe that grey-water recycling should be mandatory on all new builds. Projects that are of chief benefit to tourists and tourism operators should be financially supported by those parties. Conversion of under-utilised city buildings to residential use will make a useful contribution to reducing inner-city traffic flow, and will enhance inner city safety and security, and improve the appearance of the area; I hope that Council will act quickly on this issue.

Further feedback on the Long Term Plan:

While I think it is great for us to look forward and move ahead I do think that in these current times that if any of these strategies/plans are to be an extra cost on the rate payers of our district then the council need to reconsider which of these are important and vital and which of these are not and are just glorified projects to make the council look good!!!

The last 12+ months have not been the greatest for a lot of households and with the reality of things getting more costly I think it would be wrong for the council to increase rates without looking at what this could potentially do to a lot of families. Many of us work hard to provide for our families and while some of us have been able to absorb rising cost or cut back our spending in the last 12 months if we have to take another financial hit it would mean further financial pressure.

I do think the Long Term Plan overall needs a rethink and should not be accepted in its current state

Further feedback on the Long Term Plan:

I am apposed to the Westbrook sport precinct. It is total rubbish that the beautiful heart of Springfield should be destroyed for turf, housing and increased traffic and more fields. The council

cannot look after the fields that we have so why would you look after this proposed precinct any better. anyway.

You have heard the feedback from the residents of Springfield and the members of the golf course. This is not wanted here. If you feel that Rotorua needs a sports hub, (very debatable) Springfield is not the place to plonk it.

The "medium density housing" is also not a solution to the housing issues that Rotorua faces. It is a stupid place to want to build. It is very wet and prone to flooding in that particular area. Also the people that live in the area that this is proposed pay some of the highest rates in the city ... and now you want them to continue to pay whilst you lower the value of their properties with this so called proposal. Many of the people that live on the golf course have lived in their houses for many many years. Why .... because it is a magical pace to live.

There surely must be a better place for this sports precinct. Many have been suggested but seem to have been pooh poohed by council, yet council is willing to spend on obscene amount on this.

Please I urge the council to listen to the people that will be most effected. Find another place in this city.

Utu me ngā Hāmene - Fees and Charges *- We are proposing to increase fees and charges in a number of council services to move the burden away from the general rate payer towards the individual directly receiving the service.*

Which options for fees & charges do you support? Kōwhiri Tuarua, Panoni/whakapiki rānei ngā utu me ngā hāmene - Option 2, Adjust/increase fees and charges

Further feedback on Fees and Charges: Keep in mind that while these costs are increasing people's income isn't. It is as if you are just trying to squeeze more out of people. I think dog control should still be covered by general rates rather than increased fees, because it benefits the whole

---

Ō Reiti - Your Rates *- The uniform annual general charge (UAGC) is the fixed portion of rates that every ratepayer pays regardless of property value.*

Which option for the change in UAGC do you support? Kōwhiri Tuatoru, Kāore he panoni - Option 3, Status Quo

Further feedback on the UAGC and Rates: It is immoral for the council to propose such a massive rates increase. People's incomes haven't increased so how does the council expect them to fund rates increases. The council will be creating a lot pressure and hardship for people, many of whom

are already struggling with the economic effects of covid. I am incredulous that the council is so out of touch with the community that they would even consider such high rates increases. Rates should be kept to an absolute minimum. The council should trim off all non-essential spending and stick to core services. The expensive looking magazine you send out is not essential. It is better use of ratepayer's money to instead include a basic summary of events with the rates notices, saving on production and delivery costs.

There should be less emphasis on the capital value to decide rates. Just because a property's capital value has increased does not mean that the owner has more disposable income to spend on rates.

Further feedback on the Long Term Plan:

'Re: Draft Economic Development Strategy.

-I have concerns about the unlocking of residential land. I live in a rural residential area and value the rural space. I would not want council to encourage land being subdivided so that a rural area loses its rural character.

-Stop pouring more funding in to mountain bike development. Enough has been spent already. Spending more would not increase the popularity of Rotorua as a mountain biking destination. All it will do is add a further burden to ratepayers.

- Don't allocate spending for overseas tourism. It is pointless to allocate funding to this as it could be a long time before tourists return. Really the council should not be funding tourism at all. The businesses benefiting from it should fund it.

- Don't spend money on trying to be the 'first bilingual city'. It appears to be a vanity project for the council so it can claim bragging rights to be the first at something. It adds no economic value. People won't visit Rotorua or live here because it is a bilingual city. It is already bilingual in that there are numerous Maori street and place names and English street and place names. There is no need for each street and place to have two names. It is just a frivolous use of ratepayers money to go around changing signs.

Re: Climate Change Action Plan

Council is basing its spending on speculation about what effect climate change is having. The facts are sparse. Council should wait and see what is actually happening with the climate, with solid facts, before committing funding. No more bike paths please. There are already enough around that are barely used.

Further feedback on the UAGC and Rates:

Further feedback on the Long Term Plan:

I have to say this feedback questionnaire is the most shockingly disappointing and pathetic example I have ever had to try and complete. Rotorua Lakes Council have truly lost the plot. There are two things I would like to comment on - 1) I have a retail building in the cbd which over the last 10 years

has lost 30 to 40% of its value, some can be attributed to online sales, however I believe most of it's devalued price is a direct result of RLC "dereliction of duty" by approving fringe retail and as a consequence has "created a scary ghost town". In the past 12 months I have had to reduce rents to deal with COVID and am about to lose my good tenant, who is tourism oriented. Real estate companies have been realistic and indicated that they believe that the chances of re leasing the shop in near future are more or less nonexistent. So any increase in rates is the last straw. 2) For another day.

Further feedback on Fees and Charges:

Ō Reiti - Your Rates *- The uniform annual general charge (UAGC) is the fixed portion of rates that every ratepayer pays regardless of property value.*

Which option for the change in UAGC do you support? Kōwhiri Tuatahi, Whakaheke i te UAGC mai te $475.00 ki te $425.00 ($50.00 te rahi o te hekenga) - Option 1, Reduce the UAGC from $475.00 to

$425.00 (decrease of $50.00)

Further feedback on the UAGC and Rates: Council needs to spend more of its rates on improving the Lakes where it has increased rates significantly with minimal services provided to us. There needs to be more spent on improving Lake Rotoiti walkways and reserves and roads for residents and increased popularity as tourist destination.

Further feedback on the Long Term Plan:

Forestry shouldn't be a focus of the District, if it is low-value jobs and low value pine forests rather than natives being planted, with significant environmental impacts from debris and flooding when areas are cleared as happened in East Cape.

More emphasis on adventure tourism, natural beauty of Rotorua lakes and bushwalks, mountain biking. Create opportunities through partnership with Maori to create leasehold sections on its lands near the Lakes and commerical developments on their lands

'Manually entered via form

- With the aquatic centre. For one the council rates has to look to the future which they dont often do. We have to think of the clients in the future to encourage more to use this facility. Which means option 3 has to be the one. Dont step back or stand on the spot go forward to the future.

Further feedback on the UAGC and Rates: I am writing to you about the proposed rates increase in the 10 year plan. I have completed feedback on the plan but I also want to especially ask you as an elected representative not to increase the rates.

I am very disappointed that the council would even consider raising the rates and to such an extent. It is such a disservice to the people of Rotorua. The rates on our family home are estimated to increase about 17%. This is a massive increase. Most people have not had an increase in income and there would also be those who have suffered from the economic effects of covd-19 and have had a decreased income.

What the council is proposing is cruel. How is the council expecting people to pay a rates increase? Are they supposed forgo essential items in order to pay rates? It will be like trying to get blood out of a stone. The increase will also affect those renting, as landlords pass on the increased rates cost.

The council should be there to benefit the citizens not put further stress on them. The best thing the council can do for its citizens is to put the citizens first and make a commitment to not increase rates but to trim back anything that is not essential and just concentrate on core services. Increasing council debt is not the answer either as this just makes the burden larger for the future.

I implore you to consider the people of Rotorua and oppose any rates increase.

Whakahaumaru Hapori - Community Safety *- Council has a Draft Community Safety Plan that needs support.*

Which options to fund and deliver work to improve community safety do you support? Kōwhiri Tuatoru, Me whakatinana i tētahi mahere whakahaumaru hapori, kāore anō he pūtea e tāpae ana - Option 3, Adopt a community safety plan with no further financial contribution

Further feedback on Community Safety: This proposal is focusing on dealing with the symptoms of the real issues than actually addressing and finding solutions for the causes of them. Deal with homelessness and unemployment and the behavior will decline.

Utu me ngā Hāmene - Fees and Charges *- We are proposing to increase fees and charges in a number of council services to move the burden away from the general rate payer towards the individual directly receiving the service.*

Which options for fees & charges do you support? Kōwhiri Tuarua, Panoni/whakapiki rānei ngā utu me ngā hāmene - Option 2, Adjust/increase fees and charges

Further feedback on Fees and Charges: Extremely disappointing that the public will now be subjected to large fee increases as opposed to more incremental ones because your fees structure has not been keeping up with service costs.

Ō Reiti - Your Rates *- The uniform annual general charge (UAGC) is the fixed portion of rates that every ratepayer pays regardless of property value.*

Which option for the change in UAGC do you support? Kōwhiri Tuatahi, Whakaheke i te UAGC mai te $475.00 ki te $425.00 ($50.00 te rahi o te hekenga) - Option 1, Reduce the UAGC from $475.00 to $425.00 (decrease of $50.00)

Further feedback on the UAGC and Rates:

Further feedback on the Long Term Plan:

As far as I can see, RDC planning demonstrates a distinct lack of commitment to being a good Tiriti partner with Hapu and offers a woefully insufficient response to the Climate Change Emergency declared by our PM. We won't move forward without achieving equity and people won't commit to adopting climate change mitigation initiatives if they are in survival mode themselves.

The Hemo Rd roundabout sculpture was such a poor prioritisation of funding and such a poorly managed project that I have lost volumes of confidence in our Council and am now resentful of the proposed HIKE in rates, particularly as we have really urgent inadequacies around our waste and storm water management and infrastructure, yet huge amounts of money is still being spent on beautification schemes.

Which option for the change in UAGC do you support? Kōwhiri Tuatahi, Whakaheke i te UAGC mai te $475.00 ki te $425.00 ($50.00 te rahi o te hekenga) - Option 1, Reduce the UAGC from $475.00 to $425.00 (decrease of $50.00)

Further feedback on the UAGC and Rates:

Further feedback on the Long Term Plan:

CLIMATE CHANGE. Your own information pamphlet instructs how wetlands can be used to absorb water in a flood situation and release it slowly in a drought. Use this knowledge to establish wetlands to catch extreme flows of water from our streams such as the Ngongotaha and Waiteti. I note you are planning to use Ngati Whakaue lands for housing and 'logistics'. There is already a sort of green corridor through this which could be enlarged into wetland.

PLASTICS IN THE AWA. There is a huge problem of litter alongside our drains and Awa, being washed into the lake, and thus to the sea, with each rain. I understood there was a responsibility of landowners and businesses to prevent this happening. Many businesses totally ignore the problem. They could be encouraged to have a 'clean up our carpark' or 'Remove the Rubbish' day once a week. This includes council parks and carpark areas. I do a daily pickup in my area as do many others and a council led initiative would encourage others to do their part.

ORGANIC WASTE COLLECTION. I support this idea to reduce landfill quantity and encourage people to think differently about their waste.

We note that in this feedback form you only ask certain questions about things that you want to talk about. That does not seem fair in that you seem to conveniently keep trying to avoid the fact that in the 2021/31 LTP you have allocated 63 million to the Westbrook Precinct and yet you have not communicated anything with regard to what the master plan is, ow that is going to work, effect the

public. We understand that the Golf Club is going to be done away with. Following our community conversation last Monday week (19 April 2021) it appeared quite clear that the above proposal is not wanted in Springfield by not only the golf club, and the Springfield community but also the wider Rotorua community. I also understand there has not yet been any public consultation on this and yet the council has spent $160K of Rate payers money on it so far. Can I recommend that this removed from this TLP and proper consultations have taken place, from that we would predict that this will go no further and the Golf Club lease will be renewed.

Which option do you support? Kōwhiri Tuarua, Whakapai, te utu = $17.4 Million - Option 2, Upgrade, cost = $17.4 Million

Further feedback on the Aquatic Centre: I want to comment on the Aquatic Centre plan options. I support the middle option which will upgrade the facilities to a modern standard. An infrastructure upgrade is required but I do not support the most expensive option which council favours out of the available options. (We can wait for a new cafe and waterslide when further money is available in future years rather than take on further debt for those optional features - and there are already plenty of cafes in town! Let's separate exercise and fun from food consumption and not detract from the struggling business owners in the city at this time. In addition I don't want the council taking on further unnecessary debt. The pool complex needs upgrading to a modern standard but a waterslide and cafe and further landscaping are not my priority currently.

Please pass my view on to the team that has asked for community opinion Thank you Bronwyn Armstrong

Further feedback on the Long Term Plan:

In our opinion those Councillors whom decided to contract out Council's 3 Water Infrastructure Operations were very unwise ;In spite of being told that it would be more wise to await the impacts of our NZ Governments 3 Water reforms around 2021 and then see weather Contracting out was then prudent and does this mean that this Contractor will have to be paid out?

Water metering of our residential drinking water seems inevitable ie Western Bays, Tauranga and Whakatane has them and the 3 Water reforms will likely insist we install them or are we missing some information for this rational and has this decision of ours not to meter our residential drinking water now have unintended costly consequences?

Our Sewerage infrastructure has significant amounts of Lake Ground water leakage for years and this impacts on the ability of our Sewerage Infrastructure to meet Council's obligation to meet their Water Right and protect Our Lakes from Pollution via Council's Treated Sewerage Discharges particularily when it rains:

the re-implementation of past programes of Water Leak controls and implementaion of charging for metered Water and Sewage usage would go a long way toward protecting Council's legal obligations to meeting their water rights.

There is no gaurantee that external funding of capital cost for the Civic Centre,Museum and the projected use of the Springfield Golf clubs land;which brings to mind that the Museum has paid for Staff doing what while this facility is being renovated and closed;

we do not support the use of Springfield Golf Course's mature wooded park for sports fields ;we do support the use of this land as Park and Reserve for the Communitys and tourist use.

Our Council should not be in the business of Land Development and a coummunity Sports area would better serve the community by location around Fordlands.

Further feedback on the Long Term Plan:

This LTP is not an easy read, even without the spelling or grammatical errors. It leaves me with a feeling that perhaps that is an objective in itself, discouraging feedback and thereby facilitating adoption of the plan, or what meagre details are presented on it. Numerous references are made to consultation meetings or related documents, but little help is provided to find these for anyone seeking more background.

The LTP provides no vision that can speak to most people in our community. It seems that growth is the driving objective, but little thought about how big, or what sectors, or how this contributes to an integrated vision for developing our people and resources, or diverting from support for the low wage sectors where exploitation is increasingly common. We cannot solve our problems with the same thinking that created them; perhaps it is time to reach outside the box for some innovative thinking.

Infrastructure

there is room here for more innovation eg use the water flow from springs to generate power for monitoring and pumping, to reduce costs and increase resilience to power cuts. Similarly efforts to reduce stormwater flows and enhance other aspects could include landscape harvest/storage of water eg rainwater tanks (provide for non-potable uses), bunds/swales (retain water in soils), permeable driveways etc.

Homes and communities

There are some great examples of positive change in this. Infill housing makes more sense than greenfield in many places, and providing more active transport options is to be encouraged. I would prefer to see smaller footprint homes, perhaps 2-storey, ideally with common facilities. I am not in favour of individual solar arrays on dwellings, but support larger arrays on buildings with better demand matching ie use most power when the sun shines, to reduce technology requirements and risk to electiral grid workers. However, it is incredible to still see the airport business park cropping up - perhaps the same business leaders that promoted this in the past? - but without much additional information it is hard to comment more specifically

EDS

this has little innovation and similarities to previous 'economic recovery' plans. there are a number of 'business leaders' who are holding back progress with outdated ideas and a lack of vision. Rotorua has everything on its side to demonstrate a much more sustainable way of being. Instead the focus remains on growth - how big? how much land do we convert from productive uses to housing? how much does it cost us to replace the ecosystem services we lose? Measures such as GDP don't care whether our economic activity occurs in productive endeavours or cleaning up our messes.

Creating policies like Wood First mean nothing if we have developers consistently choosing non-wood and senior council staff support this 'cost-effective' choice. Rotorua could choose to redress incentives for steel or concrete eg consider the atmospheric impact of non-wood in all purchasing decisions.

Climate change

This is woefully understated in most council activities but the plan is heading in the right direction. there needs to be much greater understanding across all parts of the community since we will all be affected whether directly by floods or storms, or less directly by disrupted supply chains and markets, constraints on travel, pests and diseases, forced migration etc.

Further feedback on the Aquatic Centre: Hello Rotorua Lakes Council members and management team

I am a director and owner of WhiteWater New Zealand Limited and we represent WhiteWaterWest Industries Limited from Canada who are the world's largest and most water usage efficient hydroslide manufacturers, with over 600 staff (including slide path designers and engineers) and 6,000 installation worldwide. As their representatives here in New Zealand, we have undertaken 12 waterslides and play installations within New Zealand over recent years.

We also own and operate the hydroslides and AquaPlay at the Lido Aquatic Centre in Palmerston North, under a public private partnership agreement.

In recent times, we have been working with Rotorua Lakes Council staff and Rotorua Aquatic Centre pool managers, Community Leisure Management, to provide ideas and concept drawings for the new hydroslides and an AquaPlay water play structure on a splash pad for the aquatic centre.

Aquatic Centres typically face high costs when adding new attractions, as is the case with Option 3 for the aquatic centre.

We would like to promote the public private partnership model as a means of assisting with funding of the proposed new hydroslides and aquaplay. We have previously partnered with Christchurch City Council (in 2005) and with Palmerston North City Council and Community Leisure Management in 2016 to deliver new hydroslides and aquaplays at significantly reduced cost to rate payers. The latter installation won a 2016 NZRA Innovation Award for its creative funding approach.

Operating Lease is also an option offered by WhiteWater New Zealand Limited for AquaPlay installations and has been used in Palmerston North.

Whitewater New Zealand Limited would welcome the opportunity to enter into discussions on how a similar approach might be adopted to assist Rotorua Lakes Council secure the hydroslides and an aquaplay for the aquatic centre as a partial funding solution for Option 3.

Council management have my contact details should you wish to discuss this further.

Thank you for your time.

Further feedback on the Long Term Plan:

Westbrook Sports Precinct... I am not sure how this name came about when it in fact involves Springfield Golf Course and Springfield residents, I can only assume the Council are doing their best at a coverup to the wider residents of Rotorua...shame on you Councilors! I am totally against this proposal, we have lived on the edge of the Golf Course for the last 30 years and had hopes and dreams of staying here and modernising our property with our severely disabled son of 28 years, as you can guess our house is modified, mainly done at our own cost. Your plans have thrown all our dreams in the air and we do not know which way to turn. We love our area as it is, it costs the Council nothing to maintain and it should be kept as a great taonga, not bulldozed, ravaged and destroyed. There are numerous other places who would love a Sports Precinct in their area, Fordland's to name one, there are 2000 plus sections coming available so why does this Council think it needs to destroy an awesome green space/golf course, native bird & wildlife area for 155 sections and a Sports Precinct. Redevelop the Stadium, a huge white elephant and make use of those grounds. We do not need every sport in one area, what a traffic nightmare you are trying to create, our city is small in comparison and it is easy to travel to different sports grounds. I remember when I worked at the Rotorua Golf Club, early 2000 there was talk that the Maori land was going to be returned to them and they could not confirm whether it would remain a Golf Course. There was also talk of them putting the lease so high it was not going to be viable for the club to continue.....how safe is RGC??, and you are thinking of destroying Springfield Golf Club and then there would be no Golf Clubs in the Rotorua city area!! I can only hope that this Council can see sense, that Springfield Golf course is not the place for housing and a sports precinct and that we the people of Springfield can return to living and treasuring the area we live in.

Which option do you support? Kōwhiri Tuarua, Whakapai, te utu = $17.4 Million - Option 2, Upgrade, cost = $17.4 Million

Further feedback on the Aquatic Centre: Any additional requests for the area should be privately funded and those using it should be as a ` user pays ' systemAny additional requests for the area should be privately funded and those using it should be as a ` user pays ' system

---

Whakahaumaru Hapori - Community Safety *- Council has a Draft Community Safety Plan that needs support.*

Which options to fund and deliver work to improve community safety do you support? Kōwhiri Tuatoru, Me whakatinana i tētahi mahere whakahaumaru hapori, kāore anō he pūtea e tāpae ana - Option 3, Adopt a community safety plan with no further financial contribution

Further feedback on Community Safety: Sad that the statistics as a whole for Rotorua regards crime/meth use are ABOVE and beyond the national average.....so why haven't the Police been brought in with ` a big stick ' to combat this??.....this is in effect a governmental issue and should

---

Utu me ngā Hāmene - Fees and Charges *- We are proposing to increase fees and charges in a number of council services to move the burden away from the general rate payer towards the individual directly receiving the service.*

Which options for fees & charges do you support? Kōwhiri Tuarua, Panoni/whakapiki rānei ngā utu me ngā hāmene - Option 2, Adjust/increase fees and charges

Further feedback on Fees and Charges: .....STOP increasing rates !!.....USER pays !!

Ō Reiti - Your Rates *- The uniform annual general charge (UAGC) is the fixed portion of rates that every ratepayer pays regardless of property value.*

Which option for the change in UAGC do you support? Kōwhiri Tuatoru, Kāore he panoni - Option 3, Status Quo

Further feedback on the UAGC and Rates: Trying to baffle the populous with bullshit.....these figures basically result in the same outcome.....

Further feedback on the Long Term Plan:

I think the proposal in part to` partner with iwi ' , developers etc . is somewhat clouded in warm ` fuzzies '.....a read of the paperwork doesn't supply enough info as to what /where this is heading??.....MORE detail is required hence more feedback from the public thereafter .

Regards to housing .....yes....the speed up and release of lands for ALL concerned(not just one demographic) to allow building for all ranges within Rotorua society. The absurdly delayed time frames for some proposed sub divisions is beyond belief(Pukehangi road as one example). Stop toying with the idea of nonsensical housing within the likes of Springfield golf course along with the so called sports precinct >>>>>there is MORE than enough land ELSEwhere to fulfil the needs !!

Regards to Climate Change Action Plan.....another diversion for those that couldn't get everyone on board with ` Global Warming '.....another obscured sideline creating money for those that don't need it. Do some research and realize that this is a naturally occurring cycle within the earths lifetime and that cow flatulence will NOT destroy earth !.

Further feedback on the UAGC and Rates:

Further feedback on the Long Term Plan:

Firstly I would like to express my strong objection to the proposed 2021/22 rate increase on my property at 4 Te Mu Road, Lake Tarawera, of 24.6%, as per the rates calculator on your website. This increase is absolutely untenable and I ask that this be reviewed especially bearing in mind that the Tarawera community do not benefit from the basic services that our rates contribution provides to the wider community with no water supply, sewerage, refuse collection and community safety to name a few!!!

Based on all the non essential, hugely expensive projects, that do not address the basic council responsibilities of our community, proposed in the RLC LTP, ratepayers are being unnecessarily financially burdened and this is simply not acceptable.

Furthermore, if you wish to be seen to be making a difference to climate change, then surely you should be supporting and funding the Lake Tarawera Sewerage Reticulation Scheme instead of expecting even more funding from the Lake Tarawera community. Please refer to the attached document for further edification.

Thank you for giving me the opportunity to comment and for your consideration of my views.

Further feedback on the Long Term Plan:

Council have an opportunity to take a more active role in supporting community initiatives that can contribute to economic development and thriving communities. For example, our kura of Pukeroa Oruawhata (Rotorua Primary) is currently looking at establishing an innovation centre at our school. This centre will have digital suites for audio and visual production that will be of industry quality. It will also include technology for web design and online game development. There will be an indoor laboratory for botany research and development. The innovation hub will be for educational purposes, but will be available for community use as well. It will be an opportunity to develop industries that aren't identified in the LTP (online game development, music engineering, television production, botany research) to contribute to the economic development of Rotorua.

Currently the school is looking for funding, capital for the feasibility and initial start up expenditure has been secured, but the majority of the funding of $24million is needed to progress this development to the next stage. This might be an opportunity for Council to potentially have a role in supporting this initiative.

Further feedback on the Long Term Plan:

As part of transport for locals in outlaying areas, and to increase public transport for tourists (e.g. walks, cycling etc). I am suggesting that we have a water taxi/bus, that travels around the lake (and

maybe Rotoiti as well) with stops along the way (e.g. near Hamurana Springs) and to Mourea. There could be two water taxis, one that goes clockwisem the other anti-clockwise. Could be experimented during summer but if successful have all year round. People in Hamurana, Mourea and Okere Falls have no access to public transport. This would help a bit especially if it could go to Rotoiti via channel.

I am also requesting exploring the possibility of having some sort of "Dial A Bus" that goes around the lake especially to Okere Falls. This could be run when it is needed and we could phone up the day before you need it for planning. It does not put too much strain on finances as it is only one bus (mini bus) and one driver, or it could be stretched to 2 (one clockwise, one anti-clockwise) and when no-one needs it, it is not used. This will also increase options for tourists who want to go for hikes or biking further afield than central Rotorua. Water taxis were popular in the Lake District in UK and well used.

The library using the large screen, for film night (once or twice a month) in the evenings especially in winter. Charge Koha (gold coins) so families can have a evening out, at low cost. It will build up community cohesion.

Further feedback on the Long Term Plan:

Continue to improve cycleways around the town.

Reduce speed limit in urban areas to 40km/hr to improve safety.

Promote better use of public space e.g. dog exercise area in Lynmore near playcentre - only grass. Ideas are native planting, pump track, community garden, fruit/citrus trees. There is excellent evidence for urban green space improving mental health outcomes.

Further feedback on the UAGC and Rates:

Further feedback on the Long Term Plan:

We fully support and endorse the submission from The Lake Tarawera Ratepayers Association in respect of the Councils Long Term Plan and in particular, the proposed Tarawera Wastewater Reticulation Scheme.

Council should be aware by now that there are very strong feelings of inequity amongst the affected ratepayers as to the delays and to the cost. There is however a high level of acceptance that a

reticulated wastewater scheme is the right thing to be doing for the future. The issue then is not the scheme, but the manner in which the project is being promoted and governed.

In submitting feedback on the draft Plan we would like to make the following comments :-

The project is taking too long to get traction and commitment.

- Unnecessary bureaucracy, surveys and consultations are extending the timelines and exposing the risk of ever increasing cost.

- All this and we still don't have a fixed project costing based on accurate analysis, design and quotes. This could have been happening in the background funded by existing grants committed so that ratepayers could have solid number on which to vote their acceptance.

- We would contend the detailed design and costing must be completed as an urgent step toward obtaining majority community mandate (if in fact this mandate has not already been achieved).

- There is a concern that external funding committed could be lost if physical project action is not immediate.

The concern in respect of costing is in fact the open ended nature of what ratepayers are being asked to commit to.

- We are aware the $33,000 ratepayer contribution currently proposed is only an estimate and in the nature of these things is bound to increase with detailed design, quoting and in project execution and inflation over the years to 2024/25.

- There would be more solid support if there was a capped ratepayer contribution. Undoubtedly this "cap" requires validation from detailed design and therefore reinforces the call for urgent action on this next project step.

Not all ratepayers are able to pay a lump sum.

- There needs to be a more innovative and flexible approach to cater for all ratepayers. A range of optional payment methods would go a long way to acceptance of the scheme without adding additional financial cost.

Ratepayer contributions are inequitable compared to similar schemes across the RLC jurisdiction.

- There must be a commitment from Council as partner in this scheme, (indeed "Owner"), to seek further funding arrangements that lower the overall contribution from affected ratepayers.

- The total capital cost should be spread by the total capacity HUE's not just the existing HUE number to extract the contribution per HUE as the cost of the surplus capacity will be recovered from the future HUE's .

In conclusion

We support the inclusion of the Tarawera Wastewater Scheme in the Long Term Plan but strongly submit that commitment to time and cost is established with urgency so that Council and the Community can proceed with certainty and that risks, both financial and environment, are minimised.

We encourage Council to take cognisance of the quote from Mario Cuomo on page 28 of your Consultation document.

Utu me ngā Hāmene - Fees and Charges *- We are proposing to increase fees and charges in a number of council services to move the burden away from the general rate payer towards the individual directly receiving the service.*

Which options for fees & charges do you support? Kōwhiri Tuarua, Panoni/whakapiki rānei ngā utu me ngā hāmene - Option 2, Adjust/increase fees and charges

Further feedback on Fees and Charges: Support pay for services you use however council needs to ensure robust analysis of the costs for each service and the benefits that accrue to the users rather than just maintain unconstrained cost growth and status quo of service delivery.

Ō Reiti - Your Rates *- The uniform annual general charge (UAGC) is the fixed portion of rates that every ratepayer pays regardless of property value.*

Which option for the change in UAGC do you support? Kōwhiri Tuatoru, Kāore he panoni - Option 3, Status Quo

Further feedback on the UAGC and Rates: A saving of $1 to $1.50 a week per property is not worth consideration when it is just moving deck chairs around with some benefiting whilst other are disadvantaged. Don't try and show you are looking to benefit low to middle properties on the one hand whilst proposing a 9.2% rate hike next year.

Further feedback on the Long Term Plan:

This Council is just so out of touch with its community. The fact that it is even considering a 9.2% rate hike with 3.8% increases thereafter when wages have hardly increased in the past two years is ridiculous. Council should be tying rate increases to the LCI or similar rather than presenting an open wallet with a long plan full of wish lists asking rate payers to fund. I was embarrassed to watch the 1 1/2 hour video online where Thomas and Una presented the LTP to council members. The total lack of debate, financial questioning and challenge from councilors was a statement of how out of touch and unqualified they are to represent us. The impression is clear that Council managers have Councilors on a string if you just count the amount of back patting that went on during that 1 1/2 hours. This is a Council where its Mayor sits on a pedestal looking down on her members who just appear so subservient apart from one or two stand-outs. This is a Council that spends > $100,000 of rate payers money on a whim and then comes along to talk about that whim with Springfield Golf Course residents and the best they can say over and over is "It's just a proposal". As Greta Thunberg said "Shame on you." At that meeting the Mayor is in attendance but is so embarrassed she utters not a word despite more than 170 rate payers turning up. "Shame on you". This is a Council that would even consider destroying all the trees on Springfield Golf Course with all the environmental impacts that the "Westbrook Sports "Just a Proposal" idea would create whilst attempting to present itself as an environmentally conscious Council. Shame on you. This is a Council that would even consider crazy rate hikes at 9.2% in the current environment because Thomas says that is what is required. Shame on you. This is a Council that only present part of the picture for its intelligent rate payers to consider because it thinks we are ignorant and not paying attention. I speak of the fact that Council plans to move all sports to a centralised hub on Springfield Golf Course land. It will then close all the sports grounds throughout Rotorua and look to sell off that land to housing developers, It has not been open and transparent with the people of Rotorua and again "Shame on you". This is a Council that shows no accountability. There are no measures that Council commits to on which Council will be held accountable. Instead it is out of control saying give us the money and trust us. We have a sports stadium that we should be proud of but is hardly used. We have an airport extension to support international arrivals and departures that has potential but lies dormant and grossly under-utilised despite an extensive upgrade with no growth plan attached to it. This is a Council that allows Rotorua to maintain the highest crime rate in NZ, the worst economic position of any district in NZ, the hardest hit district in NZ from COVID, the highes unemployment rate in NZ and yet it is willing to spend $100M on a sports whim. Shame on you. NZ GDP has dropped 2.9% and will take > 10years to recover but hey lets propose to our residents that we increase their rates 9.2% next year and 43,4% over the next 10 years without any substantive change for the good and with little to no accountability taken by Councilors. Shame on you. This is a Council that is planning to increase its debt by $180M to support a $730M infrastructure investment despite all of the above. Wow Shame on you. This is a Council that can't make up its mind whether the Westbrook Sports proposal is in or out but hey let's put it in the plan anyway despite it costing rate payers $100M+ in years 7, 8 & 9 of the LTP drawing on $19M of the increased $180M of additional debt expected to be supported by rate payers. Shame on you. This Plan lacks so much substance. It is full of unidentified, unstated proposals with those that are stated merely a continuation of the status quo. Despite the

3rd largest economic contraction in GDP across the country, our tourism decimated, our jobs decimated, individual wage growth close to zero, businesses struggling to stay afloat this Council is looking to spend a mere $29M economic recovery fund yet let's spend $100M+ on a Westbrook Sports Precinct whim that will be a millstone on the community and destroy the local environment and impact so many local residents. This Mayor says Council is in touch with its residents and the community - the plan presents a totally different view. On this basis we do not support the LTP in the form presented. We strongly demand Council go back and bring a plan to the table that recognises and responds to the economic outlook for the next 10 years rather than delivering a wish list whilst holding its wallet open.

Specifically on the Westbrook Proposal this proposal must be not only taken out of the Plan but a commitment given that this proposal will not continue anytime into the future. Springfield Golf Course must be given certainty about is future and Council must extend the lease prior to Election 2022 by at least 50 year to give residents, rate payers, golfers and the community certainty going forward. Let's be clear this Council will not hold office beyond 2022 unless it withdraws this Westbrook proposal and commits to a new long term lease for the Club. The new Council will be required to look hard at its staff and ensure strong and strict accountabilities are in place that are tied to performance measures that respond to the challenges presented across the economic, cultural, criminal, financial and environmental pressures facing Rotorua. Remember you require our rates support, we deserve accountability an increases that have been agreed through robust and strict professional challenge. This Council does not give confidence that it is up to that task. Thanks for reading,

Further feedback on the Long Term Plan:

Regarding Proposed Lake Tarawera Sewerage Reticulation:

We live at 19E Te Mu Road, Lake Tarawera. We are absolutely committed to protecting the ecological and environmental health of the precious taonga that are the Rotorua Lakes. We fully support reticulation as being the best instant remedy for direct human environmental impact on Lake Tarawera.

However, we are absolutely against both the open-ended cost that ratepayers would be expected to pay for the scheme and the lack of options in regard to fair and equitable (with other ratepayers in the Rotorua Lakes Catchment) payment over time.

We feel that there must be a limit to potential cost to ratepayers rather than the “blank cheque” approach that RLC is asking of us currently.

Having installed an AWTS+NR approved by BOPRC just over 12 months ago, we also believe we are personally being unfairly penalised by being required to join the reticulation scheme and contribute funds as requested on top of the considerable outlay for a compliant system.

We also wonder how the Rotorua Lakes Council can, in all fairness, calculate the cost of the scheme based on 446 actual HUEs plus a further 104 projected HUEs (total 550 HUEs); then divide the balance after funding is taken into account by only 446 HUEs. We have been led to believe that RLC will require future developers to pay the lump sum payment as they join the scheme; despite the fact that the 446 current ratepayers have already covered it.

Please take this as a resounding NO to the current proposal from RLC.

Ō Reiti - Your Rates *- The uniform annual general charge (UAGC) is the fixed portion of rates that every ratepayer pays regardless of property value.*

Which option for the change in UAGC do you support? Kōwhiri Tuatahi, Whakaheke i te UAGC mai te $475.00 ki te $425.00 ($50.00 te rahi o te hekenga) - Option 1, Reduce the UAGC from $475.00 to $425.00 (decrease of $50.00)

Further feedback on the UAGC and Rates: I think there should actually be a $450 option so I am split between 1 and 3. The problem with this stems from lower farming land prices due to climate and nitrogen plans being put in place limiting the use of farm land. If this continues a larger burden of the rates will continue to be put onto residential ratepayers in the future.

Further feedback on the Long Term Plan:

My biggest concern is the increase in debt from $167m 5 years ago to $450m at the end of this LTP. This will be a significant burden on ratepayers going forward beyond this 10 year period and if interest rates spike then this could mean future work is not able to happen due to rates being used to pay the higher interest cost. The debt quantified limit has also increase over this time from 180% to 250% and doesn't provide head room if funding for some of the projects is not achieved or there is a natural disaster.

Further feedback on the Long Term Plan:

Good to see focus on climate change through the Climate Change Action Plan and in the 30 Year Infrastructure Strategy. I hope that funding is being made available to implement fully.

In the Draft Economic Development Strategy I fully support more accommodation options in the City Centre, in part to avoid urban sprawl and the need for vast infrastructure networks. However, I do not think that Council should be becoming property developers but instead working with developers to encourage them to try new things.

Further feedback on Fees and Charges:

Ō Reiti - Your Rates *- The uniform annual general charge (UAGC) is the fixed portion of rates that every ratepayer pays regardless of property value.*

Which option for the change in UAGC do you support? Kōwhiri Tuatahi, Whakaheke i te UAGC mai te $475.00 ki te $425.00 ($50.00 te rahi o te hekenga) - Option 1, Reduce the UAGC from $475.00 to $425.00 (decrease of $50.00)

Further feedback on the UAGC and Rates: As an urban residential owner, we've seen the value of our property significantly increase, which follows the national trend. This option will provide some rates relief as our property is just below the $650,000 threshold and if if my understanding is correct that properties over the value of $800,000 would be impacted more so then below that value?

Reducing the UAGC for my value property would slightly reduce the rates burden and any relief is got to be a positive given the property market and the value of homes in this current climate.

$425.00 (decrease of $50.00)

Further feedback on the UAGC and Rates:

Further feedback on the Long Term Plan:

There needs to be more being done not in upgrading recreation facitlies and information centres etc which seem to be more for either the tourist at a time where there are not alot of tourists around. Or they are used as a place for locals to escape to as a reprieve of their current lives. instead surely a better use of funds is to improve those in our community everyday core needs such as: Improving and fixing the sewerge system so that every time we have a storm or disaster involving increased water levels our local lakes and storm water systems are not negatively impacted.

Housing: stop using other agencies as the only option. Council could look at increasing their housing stock to supply options for our elderly and those disconnected within the community all while supporting agencies and iwi to help reconnect them back into the community and with their iwi in a safe non-judgemental way.

Which options to fund and deliver work to improve community safety do you support? Kōwhiri Tuarua, Hanga he mahere whakahaumaru hapori ā ka timata te whakatinana i ngā kaupapa o te mahere - Option 2, Create a community safety plan and commence delivery of initiatives

Further feedback on Community Safety: Wasting more funding on delivering initiatives where is your current templates that are already at play and have been used today.

Utu me ngā Hāmene - Fees and Charges *- We are proposing to increase fees and charges in a number of council services to move the burden away from the general rate payer towards the individual directly receiving the service.*

Which options for fees & charges do you support?

Further feedback on Fees and Charges: Do not support any listed council fees are over extreme currently and the cost of sub dividing sections to the traffic parking to dog fees. But all the wages remain the same with increases.

Ō Reiti - Your Rates *- The uniform annual general charge (UAGC) is the fixed portion of rates that every ratepayer pays regardless of property value.*

Which option for the change in UAGC do you support?

Further feedback on the UAGC and Rates: Identified high.pollution dwellings have not be factored in to date working collaboratively with local iwi Maori has still not been addressed to date. Ngaouna exposure to sewerage system stink stench H2S gasses Methane and add Mill pollution from council consents to damage stale old pipes in Hona Road backed up plumbing that impacted over 10 homes along Hurunga Ave Te Araki Place Moses Road to waterways carved through Te Papa-a-rua-moa our whenua Maori Owned of course used as a convient spill out to cater for Lynmore crap. As well as the upcoming sewerage connection from Tarawera to Okareka to town sewerage back down to the Maori Village again Maori to take all the overworked system. Things need to change drastically as poisoning polluting one area identified Ngapuna has to stop. Re direct the sewerage lines along Te Ngae Road move the pump station along Te Ngae Road poisoning polluting six hapu is a deliberate racist foundation to carrying on destroying generations.

Charges for rates have never been supported in reduction from highly exposed dwellings living in and around poisons toxics from Council consents.

Further feedback on the Long Term Plan:

SUBMISSION

We have serious concerns about the pump station in Ngapuna (see the wastewater infrastructure section on p 24). This has suffered significant failure recently. We need urgent action, particularly for the residents of Ngapuna who live with the stench of wastewater and the noise and disruption of sleep when the pump station breaks down. This is part of the bigger problem of the impact on the health and wellbeing of our people who have suffered sore eyes, emphysema and respiratory problems from the impact of Council approved activities in our papakainga.

We need direct and meaningful discussions with Council about the seven strategic district infrastructure challenges on page 20. These are urgent, critical challenges for our people. We want to be involved in the decision-making.

We seek alignment with the principles of the Three Waters Strategy, particularly regarding public health and iwi partnership (p23).

Our long-term priority is the removal of the pump station and the waste water treatment plant as well as the associated pipes and infrastructure from their current locations in and around Ngapuna.

The existing infrastructure does not serve our communities, as shown with the breakdown of the Ngapuna pump station. How will it cope with the added pressure of new housing (p6) and climate change (p18)?

On page 21 there is a note that "*Across 2021-2031 we will invest $424 million into core infrastructure to renew and upgrade our assets to meet current demand and future growth expectations." What are the specific intentions for the infrastructure in Ngapuna?

Furthermore, we want to be involved in the investigation of future land use options around Vaughan's Rd (purple areas on the map on p6). The impact of industrial land uses in Ngapuna has had severe negative impacts on our whanau for generations

Further feedback on the Long Term Plan:

I support the RLC the proposed financial investments in Home & Thriving Communities Strategy, particularly on the Eastside and Westside proposal. I would strongly recommend that the future land use designation of the land in Ngāpuna be made a priority and that no further consents are granted for large industry that adversely affects the residents of Ngapuna, without consultation from within their community.

I also support the investment into the development of the Owhatiura and Peka blocks which will 1. help increase jobs stimulus for our city and 2. allow undeveloped Maori land to be unlocked.

Whakahaumaru Hapori - Community Safety *- Council has a Draft Community Safety Plan that needs support.*

Which options to fund and deliver work to improve community safety do you support? Kōwhiri Tuatahi, Hanga he mahere whakahaumaru hapori hei whakatinana - Option 1, Create a community safety plan for implementation

Further feedback on Community Safety: Previous years a lot of community police stations were opened and now closed with no purpose to the community. There are all these assets you have created with funding through increase in rates and yet are sitting there generating no benefit at all.

Utu me ngā Hāmene - Fees and Charges *- We are proposing to increase fees and charges in a number of council services to move the burden away from the general rate payer towards the individual directly receiving the service.*

Which options for fees & charges do you support? Kōwhiri Tuarua, Panoni/whakapiki rānei ngā utu me ngā hāmene - Option 2, Adjust/increase fees and charges

Further feedback on Fees and Charges: Rates are increased through UAGC as the capital value of homes Rotorua wide are only going up in the future - as we see in NGAPUNA. The property bubble is only surging prices of homes up nationally.

Ō Reiti - Your Rates *- The uniform annual general charge (UAGC) is the fixed portion of rates that every ratepayer pays regardless of property value.*

Which option for the change in UAGC do you support? Kōwhiri Tuatoru, Kāore he panoni - Option 3, Status Quo

Further feedback on the UAGC and Rates: You are rating us based on our capital value of our homes especially in this increasing property bubble. NGAPUNA is unfairly valued based on the industry

around us - and the value is to business vs personal. Yet you have surrounded us in pollution and getting sick as a result yet the value is in the people not industry

---

Further feedback on the Long Term Plan:

I would like to see the sewerage station pushed back across the river (Puarenga). Its not handling all the rains especially with the increase forecasted in your climate change plan. Keep our waters clean. No spraying sewerage up the redwoods and and we are at the lowest point and the sewerage flows right past us. Also I've noticed huge rats size of possums located near the plant and station. My moko at Mokoia Intermediate is involved in their clean up program to remove these large rodents. In addition the medical hazards affecting my whanau directly next to the wastewater pump. Very frustrated.

Further feedback on the UAGC and Rates:

Further feedback on the Long Term Plan:

I think that waiting 10 years to improve our sports fields in the area is too long. We currently have more than enough sports fields in Rotorua but they are in need of unguent care and attention.

There are currently several large areas of land that could be used for new sports fields without the need to close the only golf course owned by the ratepayers of Rotorua. Moving most of the sports to a central sports hub is going to disadvantage a lot of Rotorua locals that don't live in close proximity to the hub as they will be required to travel across town to attend club training/games (currently I believe none of the local sports clubs have requested or want to leave their current sports grounds).

Sport is a critical part of the Kiwi culture and we need to make sports fields as accessible as possible to the entire community. Doing this can potentially reduce crime rates as participation in sports is known to reduce the likelihood of a person being involved in crime.

The current grounds at Westbrook already have enough land available to create an extra 3 full-sized fields without any major redevelopment. The master plan is only offering 8 new fields for Rotorua and two of the rugby clubs have now been told that they might not need to relocate so this reduces the need for 3 other fields. Fields that have not been included in the master plan calculations are Jackson Park, Rowi Street Reserve, Jessie Marton Park, Glenholme Reserve, and Linton Park (at least 8 full-size fields). This does not even take into account that a lot of the club teams train at their local schools.

I do wish to see improvements for our sports grounds made a priority for our kids today and not in 10 years' time.

Kinds regards

Mark Smith

Further feedback on the UAGC and Rates:

Further feedback on the Long Term Plan:

This feedback relates to the 30 year Infrastructure Strategy and the Homes & Thriving Communities Strategy directly. The people of Ngāpuna are affected by the poor quality infrastructure that the city has but have felt directly with the failure of the waste water pump stations on Hona Rd. We need this pump station to moved from the residential area because in the last 18 months to 2 years the pump station has failed and left treated and untreated sewage on family properties. Ngāpuna is a special character village which we are very proud of and we should not have to deal with this issue as closely as we have. The pump stations are too close to our homes and when they fail the by product has a significant impact on our well being. I realise that the waste water system is tied together with a network of underground pipes which are difficult to reconfigure but with the long term nature of our living circumstances, in an industrial zone we feel that this should be a priority for the Lakes Council. Ngāpuna should be made bulletproof from these effects as we are working closely with Council, CNI Directors, TALT, Timberlands as local hapu to bring about the best possible solution for the larger Waste Water Treatment system being worked through currently.

Further feedback on the UAGC and Rates: High income people deserve to pay more to ensure that people who are on lower incomes get to live with dignity. Tax the rich because they can afford it.

Further feedback on the Long Term Plan:

In terms of the the draft economic plan development strategy, there must be climate friendly options and preferences for these businesses. It is the Council's role to ensure that any new or incoming commercial, industrial and housing solutions be put through a climate test to see whether or not it will cause more harm, or if it will be part of climate action and aid in mitigation. There is no point in economic prosperity if there is no planet to live on. I hope that within this plan, that it is based off a circular economics model, and not one that continues to thrive off the exploitation of both people and Papatūānuku. We must continue to focus our economics models on people first. A lack of mentioning the importance the consumers of the products is a bit worrying within the draft and a reliance on those driven by profit, money and power shows that this economic plan may not be in line with people before profit.

Every single contract and employee that comes through this City and especially who is contracted by the Council, must be paid a living wage of $22.75 or more. This is imperative to ensure not only that we retain our awesome community members who make all the difference, as well as ensuring that this Council genuinely believes that all people must have the ability to live with dignity. This would mean that they can afford to go to our attractions in our rohe. This in turn helps our tourism sector.

Today, there are hundreds of thousands of people in Aotearoa whoa re employed on the minimum wage, or just a little over. Despite all their hard work, they will not earn enough to enjoy that decent life. They put in long hours, often in more than one job, but find that financial security and the change to fully provide for their family is beyond their means. That is not the Rotorua any of us want to live in.

Adopting the Living Wage will make a direct difference to the problem of low wages in Rotorua. But, more than this, Council’s adoption of the Living Wage will make it clear the Living Wage is something that all the City’s employers should aspire to. And it is a concrete demonstration of our City’s commitment to a more prosperous future for everyone.

Lastly, the Living Wage is the cornerstone of ensuring that the people doing the mahi to ensure that this Long Term Plan delivers the highest quality services possible.

Climate change-priority #4

There is no inherent discussion about accessibility in climate mitigation and adaptation. A simple word search within the climate action plan shows there is no mention of the word accessibility. This is a disservice to marginalised communities like the disabled. I would like to see more streets become like Eat Street; closed off to vehicles. As research has shown, there are more benefits to

alternative modes of transport such as cycling, walking, scootering and that is not captured enough in this plan. In particular, this Council should look to Hamilton City Councils Biking and Mobility plan as it covers a lot of the accessibility issues. One issue is that our cycle ways do not have the adequate infrastructure in place to protect someone from cycling such as barricades to stop cars from driving in the cycle lane.

It's a bit concerning that the Council is not waiting for the recommendations of the Climate Change Commission Reports as it would be crucial to be in line with that. Waiting until 2050 to be net zero is a long time when we only have 8 years until irreversible damage is caused. There is still time for more mitigation. This needs to be highlighted a priority.

A lot of our key industries are involved in 'just-transition' and there has not been a lot of emphasis on this. For the rural sector, this is extremely important.

Further feedback on Fees and Charges: Concerned venues might mean sports grounds too, Rotorua sports cannot sustain increased field charges especially as Rotorua's sports facilities are not fit for current purpose, other locations do not charge codes to use their sports fields and what are be

---

Ō Reiti - Your Rates *- The uniform annual general charge (UAGC) is the fixed portion of rates that every ratepayer pays regardless of property value.*

Which option for the change in UAGC do you support? Kōwhiri Tuarua, Whakaheke ki te $400 ($75.00 te rahi o te hekenga) - Option 2, Reduce to $400.00 (decrease of $75.00)

Further feedback on the UAGC and Rates: it is more equitable to charge per $100,000 as otherwise it is disproportional and penalises those with less expensive houses

---

Further feedback on the Long Term Plan:

The majority of sports fields for Rotorua do not meet current need, let alone future need and yet codes are paying for the use (when neighbouring cities' sports users do not).

Sports fields must be fit for purpose and well planned to future proof, local expertise from the codes they are running needs to be prioritized in consultation. Participation in codes, and the ability for codes to succeed and grow contributes to local wellbeing and vibrancy of the city. The short, medium and long term provision must meet local needs, both current and future, and the cost to codes once in place must be considered - the importance of accessibility (including cost of participation) cannot be forgotten in the drive for improvements. Meeting local need is also paramount. What can be proposed and provided needs to be understood in the local context, rather than it sounding good from a big picture overview.

A single hubs needs to consider how we ensure the important sense of identity without hierarchy between codes. Future sports field provision needs to take into account accessibility to all who live here - bus routes and times, safe cycle ways, not just assume everyone will or can drive. The type of playing and training surfaces needs to meet local need, be fit for purpose and its ongoing cost not prohibit use and actually encourage participation.

Rotorua is missing fit for purpose multi-use indoor facilities too, already there isn't enough indoor space to facilitate demand.

Further feedback on the UAGC and Rates:

Further feedback on the Long Term Plan:

The 30 year Infrastructure Strategy and Thriving Communities Strategy are the areas that I am most interested in as well planned infrastructure in its placement, repair or replacement are vital to

thriving communities and how economic development is planned and/or attracted into the city to operate.

Its clear that Rotorua is one of the most picturesque places in the world and our Covid hit town relies on the gifts that our natural surroundings offer so people want to come and live in our beautiful city.

In order to maintain any aspirational goal for Rotorua requires that we are able to sustain this environment which brings me to the larger issue of waste water and the system of processing the 20mil litres per day. Its underground network of pipes all laid out to take advantage of gravity and the pump houses that push all the wastewater to the treatment plant.

I would like to see a continued dialogue into perpetuity if necessary in order to find a solution that allows all people of Rotorua to thrive, our environment to remain pristine and the gifts of Mana Whenua to be acknowledged. Principally our working activity dis affect the environment but the majority of our citizens are unaware of the impact of what it takes to manage the modern flushing toilet.

Ngāpuna would like as a first step to have the pump station on Hona Rd removed so our whanau do not have to live with the uncertainty of the sewage backing up onto their front lawns during a heavy rain event. If the technology and budgets allow the waste water treatment plant should be moved wholly to another site. With 20/20 hindsight it was probably not the smartest idea to have it situated on the bank of a river. The attached PDF has more information to add to this submission.

Take out the wastewater pump and station from Ngapuna.

Relocation of all poisoning industry surrounding all of Ngapuna.

Put back the road at the end of Hona Road that was supposed to access Papa Rua Moa property - as their road access crosses through another property - 2nd A Residue. This road was there in the 70's and was taken without consultation and removed completely.

Access funds to tidy up around Papa Rua Moa and 2nd A Residue

Health system around Ngapuna is lacking especially for our Kaumatua. Health programs to uplift the wellbeing of our elderly as well as all residents from Ngapuna.

I would like to see a building at our Marae to teach our kids skill sets that will benefit the community. If you have any spare buildings that can be relocated to Hurunga Te Rangi Urupa. As a Chairperson of the Hurunga Te Rangi Urupa Trust

I'd like to see empty sections in Ngapuna with tiny homes for our family. Addressing our mental issues locally as well. Papakainga for our homeless - tiny homes

There is a pool located on Papa Rua Moa and possibly 2nd A Residue that needs to be filled.

Can someone please address your possum rats located near our Puarenga that are scrambling around the neighbourhood.

We have geothermal activity surrounding us that is not being utilised for our benefits - heating and energy / electricity

Further feedback on the Long Term Plan:

I am submitting on behalf of the South Waikato District Council.

This submission is to request a reinstatement of assistance from RLC towards funding of the operating costs of the Upper Atiamuri Hall located at 310 State Highway 30, Upper Atiamuri.

The hall is located in the South Waikato District, close to boundaru with the Rotorua District.

The hall is used by residents of both Districts.

From at least 1995, through to the 2015-16 year, RLC contributed towards the costs of the hall. Agreements were reached through long term plans for RLC to provide funding to SWDC who invoiced RLC for a share of the hall costs. A document attached shows the last correspondence on the topic that we have. The document shows that RLC contributed towards 75% of costs for the majority of the period. From 2012 the amount was reduced to $2500 +GST, with CPI added in the following 3 years.

The arrangement lapsed after the 2015-16 year. This was due to staff changes at the SWDC resulting in us not requesting funding towards the hall.

The Hall is operated by a local committee who record useage but in recent years not sufficiently enough to show the exact domicile of the hall users. It is known that the hall is used periodically for weddings, and regularly By groups for Pilates, Community Cards, Childrens Focus and Church Bible Study. It was used last year by Electionz as a polling booth location and no doubt some Rotorua District residence vited there. Past records suggest there were more rating units in the Rotorua District (50) within a hall catchment area, than there are South Waikato Rating units. There are 32 rating units in the SW part of the catchment area. This is a radius of 6km of the hall. Beyond that is forestry, and beyond that the rating units fall into other hall catchment areas. Potential users of the hall in the Rotorua district would be on SH 30 including perhaps the Upper Atiamuri School, Ohakuri Road, or Parsons Roads.

On behalf of the SWDC, I request RLC budge for a 50% contribution towards hall operating costs in the next 3 years. The operating budget for 2021-22 is $11,834, less $1000 hall hire revenue + $10,834. Depreciation of $3,683 is not funded therefore the net operating expenses funded from rates is $7151. I request a contribution of $3575.50 + GST, + cpi in years 2 and 3 of the LTP.

Although this amount is not significant, it will assist the residents in the South Waikato Hall catchment area who fund the operating costs through a targeted rate. With only 32 rating units in the SW hall cachment area, they are facing a targeted rate in 2021-22 of $257 + GST each if there is no cost sharing with RLC.

SWDC has a similar arrangement with the Matamata Piako District where we contribute towards the operating costs of a hall in the MPDC district close to our boundary.

Thanks you for your consideration. I have twice tried to attach the document referred to above however have not had any confirmation that it has worked. Please contact me for any additional information.

Martin Warren

Which option for the change in UAGC do you support? E aua - Not sure

Further feedback on the UAGC and Rates: Once the proposed 9.2% rates increase for this year is in place it becomes permanent. Forecast 3.8% increases for subsequent 9 years will be on top of or additional to that 9.2%. Has RLC considered how Pensioners and others on modest fixed income can fund such extreme rates rises? Some long term Rotorua resident rate payers will be faced with either selling up to keep afloat or mortgaging their home to pay crippling rates. The complexity of rate issues including funding of community infrastructure is acknowledged. My submission: greater emphasis on user pays (targeted fees for services) and linking general rates increases to the CPI movement. Such approach would provide a framework for more equitable ability to pay across all sections of the community including the high earning young, and seniors/others on modest fixed income.

Te Whare Kauhoe - Aquatic Centre *- Council is asking the community how much they want to spend on upgrading the Aquatic Centre to ensure it is a fit-for-purpose, shared public facility.*

Which option do you support? Kōwhiri Tuatahi, Whakatika, te utu = $8 Million - Option 1, Repair, cost = $8 Million

Further feedback on the Aquatic Centre: It is silly to think that Rural and ratepayers living on the lakes would wish to fund more than minimal expenditure on a watersport facility in town.It is silly to think that Rural and ratepayers living on the lakes would wish to fund more than minimal expenditure on a watersport facility in town.

Whakahaumaru Hapori - Community Safety *- Council has a Draft Community Safety Plan that needs support.*

Which options to fund and deliver work to improve community safety do you support? E aua - Not sure

Further feedback on Community Safety: Community safety is a Police and Government responsibility. Zero funding from rates.

Utu me ngā Hāmene - Fees and Charges *- We are proposing to increase fees and charges in a number of council services to move the burden away from the general rate payer towards the individual directly receiving the service.*

Which options for fees & charges do you support? Kōwhiri Tuarua, Panoni/whakapiki rānei ngā utu me ngā hāmene - Option 2, Adjust/increase fees and charges

Further feedback on Fees and Charges: No way should a ratepayer pay for a liquor licence (as an example). All council departments need to be reviewed with a view to slashing overheads and replacing staff with people who have the required skills.

Ō Reiti - Your Rates *- The uniform annual general charge (UAGC) is the fixed portion of rates that every ratepayer pays regardless of property value.*

Which option for the change in UAGC do you support? Kōwhiri Tuarua, Whakaheke ki te $400 ($75.00 te rahi o te hekenga) - Option 2, Reduce to $400.00 (decrease of $75.00)

Further feedback on the UAGC and Rates: The rate increases proposed are exorbitant and not affordable so option 2 is more palatable for those least able to afford.

Further feedback on the Long Term Plan:

The proposed size of the rates increase particularly for rural residential property owners is just very difficult to understand given that every single person in this country should be minimizing their expenditure as we do not know what is ahead of us given the covid related uncertainty and enormous government borrowings. RLC should not be involving itself in property development and it is just simply shameful that our rates are being used for that purpose with no likelihood of it ever giving us a return. Housing shortage is a central government problem. Council should be looking to reduce its expenditure by at least 20% for the next two years, take a look at what areas or services need to be axed and DO IT..... Otherwise our mokopuna will be even less able to afford a house. Rebates of $660 are available but how on earth are these rebates supposed to keep up with rate increases of $500 on very modest rural houses which are occupied by many low income earners and retirees ?

Which option do you support? Kōwhiri Tuatahi, Whakatika, te utu = $8 Million - Option 1, Repair, cost = $8 Million

Further feedback on the Aquatic Centre: In a covid world -under exceptional circumstances, the Lakes Council cannot budget in a normal way. It has a moral obligation to tighten its expenditure through this time period, until our community is in a better financial position to support the RLC's wish-list. As our community is currently struggling to find jobs & pay for the cost of living, so the RLC must be sympathetic to & reflect this.In a covid world -under exceptional circumstances, the Lakes Council cannot budget in a normal way. It has a moral obligation to tighten its expenditure through this time period, until our community is in a better financial position to support the RLC's wish-list. As our community is currently struggling to find jobs & pay for the cost of living, so the RLC must be sympathetic to & reflect this.

Whakahaumaru Hapori - Community Safety *- Council has a Draft Community Safety Plan that needs support.*

Which options to fund and deliver work to improve community safety do you support? Kōwhiri Tuarua, Hanga he mahere whakahaumaru hapori ā ka timata te whakatinana i ngā kaupapa o te mahere - Option 2, Create a community safety plan and commence delivery of initiatives

Further feedback on Community Safety: Unless it deals with the safety of our community. -if we dont have a safe community the RLC would be struggling to govern. This is a core requirement. Currently the safety of our community seems to be compromised -Council MUST adress this issue.

Utu me ngā Hāmene - Fees and Charges *- We are proposing to increase fees and charges in a number of council services to move the burden away from the general rate payer towards the individual directly receiving the service.*

Which options for fees & charges do you support? Kōwhiri Tuarua, Panoni/whakapiki rānei ngā utu me ngā hāmene - Option 2, Adjust/increase fees and charges

Further feedback on Fees and Charges: I would also like to see a regular assessment of all providers & contracts of services. Perhaps outside business expertise could advise on this.

Ō Reiti - Your Rates *- The uniform annual general charge (UAGC) is the fixed portion of rates that every ratepayer pays regardless of property value.*

Which option for the change in UAGC do you support? Kōwhiri Tuatoru, Kāore he panoni - Option 3, Status Quo

Further feedback on the UAGC and Rates: The significant rates rise that council has proposed is of concern. In a current Covid crisis this community is struggling financially. I am currently unemployed with little hope of re-employment. My husband has been cut back to a 4 day working week. We are cutting back substantially to pay our bills/cost of living. As Council must reflect the community it governs & is financed through rates paid by this community -so the council needs to cut back its expenditure until this current financial environment changes. No increase in rates is all the council can morally consider at this time.

Further feedback on the Long Term Plan:

There have been a number of submission to RLC regarding the Westbrook Sports Hub proposal involving the termination of the Springfield Golf Club lease.

I too disagree with this proposal.

The negative impact it will have on residents & community, heritage flora & fauna, roading access, clean water/utuhina stream & storm water issues, air quality & carbon emissions (trees), open spaces in relation/proportion to increasing housing development, not to mention the loss to golfers/sports people who currently use the golf course/reserve, -the total loss & problems created would be overwhelming.

The infringement to residents -their property investment & their homelife - would be unacceptable.

I also feel the cost of this proposal is an issue at this time. I suggest the Council is better to spend money on upgrading our current varied suburban fields & work with our existing suburban sports clubs to find better solutions to the issues.

This proposal needs to be shelved for the duration of this current financial crisis. If at a future point the Council decides they are in a better position financially to pursue it, they need to float an alternative site.

Further feedback on the Long Term Plan:

Can I start by saying submitting to Rotorua District Council feels like a waste of time. Comments by the Mayor and some Councillors over the recent Marguerita Street consultation confirms this.

However I do want to ask Council to consider if such large Rates increases are acceptable, especially in view of Covid 19 and difficult financial times for many. Many people have fixed incomes and these continual large increases are not matched by increased income. Council needs to look at which project are essential and those that are "would be nice but we actually can not afford them". I believe Councillors should direct the CEO and his staff to come back with a plan that is affordable.

I would respectfully ask Council to listen to the vast majority of local people and renew the lease for Springfield Golf Club. A large green public area in the middle of a city should be saved. Please leave Springfield Golf Club as it is.

Something needs to be done to improve the delivery of Council Service to those wanting to develop land or sub-divide property. It seems the process is not as user friendly as it should be. The Mayor made an announcement 3 or 4 years ago about 1000 residential section coming to the market But where are they ?? The housing shortage in Rotorua has to be addressed immediately - not just more talk about a plan.

MSD funded people living permanently (and it seems illegally) in Motels in our city needs urgent action. This is a problem created by Central Government and they need to fix it NOW. The situation has reached a critical point where tourism is or will be effected - people will simply stop coming here.

To finish on a positive note, the work that has been done on Longmile Road and around the Redwoods area is amazing - a real asset to Rotorua for both locals and visitors.

Regards Trevor Newbrook.

Further feedback on the UAGC and Rates:

Further feedback on the Long Term Plan:

I would like to know if the infrastructure strategy will include upgrading of the storm water and sewage system problems in Petrie Street.

When it rains heavily enough the stormwater and sewer manhole covers blow off and flood the street from 22-28 Petrie street.

Human waste is released onto the road, foothpaths, driveways and walkways.

The human waste then drains back into the stormwater and into the Utuhina Stream.

Will this be rectified under the long term plan?

---

Ō Reiti - Your Rates *- The uniform annual general charge (UAGC) is the fixed portion of rates that every ratepayer pays regardless of property value.*

Which option for the change in UAGC do you support? Kōwhiri Tuatoru, Kāore he panoni - Option 3, Status Quo

Further feedback on the UAGC and Rates: The value of properties around Ngapuna are increasing in value however the quality of life and air surrounding Ngapuna is poor and unhealthy. Why are you increasing our costs based on Capital value when it is business who is driving the capital value up.

Further feedback on the Long Term Plan:

We have serious concerns about the pump station in Ngapuna (see the wastewater infrastructure section on p 24). This has suffered significant failure recently. We need urgent action, particularly for the residents of Ngapuna who live with the stench of wastewater and the noise and disruption of sleep when the pump station breaks down. This is part of the bigger problem of the impact on the health and wellbeing of our people who have suffered sore eyes, emphysema and respiratory problems from the impact of Council approved activities in our papakainga.

We need direct and meaningful discussions with Council about the seven strategic district infrastructure challenges on page 20. These are urgent, critical challenges for our people. We want to be involved in the decision-making.

We seek alignment with the principles of the Three Waters Strategy, particularly regarding public health and iwi partnership (p23).

Our long-term priority is the removal of the pump station and the waste water treatment plant as well as the associated pipes and infrastructure from their current locations in and around Ngapuna.

The existing infrastructure does not serve our communities, as shown with the breakdown of the Ngapuna pump station. How will it cope with the added pressure of new housing (p6) and climate change (p18)?

On page 21 there is a note that "*Across 2021-2031 we will invest $424 million into core infrastructure to renew and upgrade our assets to meet current demand and future growth expectations." What are the specific intentions for the infrastructure in Ngapuna?

Furthermore, we want to be involved in the investigation of future land use options around Vaughan's Rd (purple areas on the map on p6). The impact of industrial land uses in Ngapuna has had severe negative impacts on our whanau for generations

Te Whare Kauhoe - Aquatic Centre *- Council is asking the community how much they want to spend on upgrading the Aquatic Centre to ensure it is a fit-for-purpose, shared public facility.*

Which option do you support? Kōwhiri Tuatahi, Whakatika, te utu = $8 Million - Option 1, Repair, cost = $8 Million

Further feedback on the Aquatic Centre: Now is not the time to spend large amounts of money on upgrading the Aquatic Centre, when poverty is prevailing in Rotorua and families are struggling to make ends meet. Repair now and upgrade at a later time when the wealth of the city and it's residents and occupants improves to a point that the spending can be justifiedNow is not the time to spend large amounts of money on upgrading the Aquatic Centre, when poverty is prevailing in Rotorua and families are struggling to make ends meet. Repair now and upgrade at a later time when the wealth of the city and it's residents and occupants improves to a point that the spending can be justified

---

Whakahaumaru Hapori - Community Safety *- Council has a Draft Community Safety Plan that needs support.*

Which options to fund and deliver work to improve community safety do you support?

Further feedback on Community Safety: none of the options are acceptable. It is not acceptable that Rotorua is the crime capital of New Zealand. The upsurge in crime, homelessness and anti social activities has come about during this Councils term in office and as a direct result of actions

---

Utu me ngā Hāmene - Fees and Charges *- We are proposing to increase fees and charges in a number of council services to move the burden away from the general rate payer towards the individual directly receiving the service.*

Which options for fees & charges do you support?

Further feedback on Fees and Charges: If Council were in business it would have been bankrupted by now. I do not support any increase in rates as an offset. Rotorua rates are already one of the highest in the country. Continuing user pays is a preference. However, fees for many services

---

Ō Reiti - Your Rates *- The uniform annual general charge (UAGC) is the fixed portion of rates that every ratepayer pays regardless of property value.*

Which option for the change in UAGC do you support? Kōwhiri Tuatoru, Kāore he panoni - Option 3, Status Quo

Further feedback on the UAGC and Rates: Rotorua has one of the highest annual rates charges in the country. Much of the rating take being used for purposes that do not generate income or add value. It is concerning that Council is considering a rating increase of up to 15% for some properties at a time when businesses in the district are failing, farmers have greater fee charges to comply with Governmental decrees, homeless families being relocated to the area, criminal and anti social behaviour. Rate increases will push people over the edge. Council should endeavour to maintain/minimise its expenditure focus on core infrastructure to maintain and improve such services, not indulge in projects that for a majority of people have no benefit to them.

Further feedback on the Long Term Plan:

See file attached.

Utu me ngā Hāmene - Fees and Charges *- We are proposing to increase fees and charges in a number of council services to move the burden away from the general rate payer towards the individual directly receiving the service.*

Which options for fees & charges do you support? Kōwhiri Tuarua, Panoni/whakapiki rānei ngā utu me ngā hāmene - Option 2, Adjust/increase fees and charges

Further feedback on Fees and Charges: You are getting enough rates from all other increases

---

Ō Reiti - Your Rates *- The uniform annual general charge (UAGC) is the fixed portion of rates that every ratepayer pays regardless of property value.*

Which option for the change in UAGC do you support? Kōwhiri Tuatoru, Kāore he panoni - Option 3, Status Quo

Further feedback on the UAGC and Rates:

Further feedback on the Long Term Plan:

We have serious concerns about the pump station in Ngapuna (see the wastewater infrastructure section on p 24). This has suffered significant failure recently. We need urgent action, particularly for the residents of Ngapuna who live with the stench of wastewater and the noise and disruption of sleep when the pump station breaks down. This is part of the bigger problem of the impact on the health and wellbeing of our people who have suffered sore eyes, emphysema and respiratory problems from the impact of Council approved activities in our papakainga.

We need direct and meaningful discussions with Council about the seven strategic district infrastructure challenges on page 20. These are urgent, critical challenges for our people. We want to be involved in the decision-making.

We seek alignment with the principles of the Three Waters Strategy, particularly regarding public health and iwi partnership (p23).

Our long-term priority is the removal of the pump station and the waste water treatment plant as well as the associated pipes and infrastructure from their current locations in and around Ngapuna.

The existing infrastructure does not serve our communities, as shown with the breakdown of the Ngapuna pump station. How will it cope with the added pressure of new housing (p6) and climate change (p18)?

On page 21 there is a note that "*Across 2021-2031 we will invest $424 million into core infrastructure to renew and upgrade our assets to meet current demand and future growth expectations." What are the specific intentions for the infrastructure in Ngapuna?

Furthermore, we want to be involved in the investigation of future land use options around Vaughan's Rd (purple areas on the map on p6). The impact of industrial land uses in Ngapuna has had severe negative impacts on our whanau for generations

Which option do you support? Kōwhiri Tuatahi, Whakatika, te utu = $8 Million - Option 1, Repair, cost = $8 Million

Further feedback on the Aquatic Centre: we only need the basics. The mobile cafe did not work and a new one will not work.

We should not need to borrow to fund all this capex. The council should be prudent enough in its budget to put aside money for capex and work within a 1.2x borrowing to revenue ratio, not 2.5x. The P.I.G.S. had there problems because local government loaned German money. They could not pay it back at even 1.2x revenue for borrowing. the government had to take up the debt.

we only need the basics. The mobile cafe did not work and a new one will not work.

We should not need to borrow to fund all this capex. The council should be prudent enough in its budget to put aside money for capex and work within a 1.2x borrowing to revenue ratio, not 2.5x. Whakahaumaru Hapori - Community Safety *- Council has a Draft Community Safety Plan that needs support.*

Which options to fund and deliver work to improve community safety do you support? Kōwhiri Tuatoru, Me whakatinana i tētahi mahere whakahaumaru hapori, kāore anō he pūtea e tāpae ana - Option 3, Adopt a community safety plan with no further financial contribution

Further feedback on Community Safety: even if you had a 1000 CCTV it would not make a difference to the safety of citizens. ie UK.

It all comes back to economic welfare/parents and the first 1000 days of life.

A better use of community safety money would be having level footpaths!

Utu me ngā Hāmene - Fees and Charges *- We are proposing to increase fees and charges in a number of council services to move the burden away from the general rate payer towards the individual directly receiving the service.*

Which options for fees & charges do you support? Kōwhiri Tuarua, Panoni/whakapiki rānei ngā utu me ngā hāmene - Option 2, Adjust/increase fees and charges

Further feedback on Fees and Charges: The council needs to revenue its cost structure and staffing levels. costs should be going down as inflation is only 1.2%.

Ō Reiti - Your Rates *- The uniform annual general charge (UAGC) is the fixed portion of rates that every ratepayer pays regardless of property value.*

Which option for the change in UAGC do you support? Kōwhiri Tuatoru, Kāore he panoni - Option 3, Status Quo

Further feedback on the UAGC and Rates: The council needs to implement a poll tax alongside a rating system. UGAC is the proportion that every household pays for council services. this should be increased not decreased.

the council needs to change its ratio of business rates to residential. Business needs to pay more. Residents cannot write it off in their taxation!

Further feedback on the Long Term Plan:

10 year infrastructure plan.

the population of Rotorua has not increased to the level it was 20 years ago. there is no need for capex for current demand. there is a need for new capex for future growth which can be tailored to a specific investment.

the council could have used the 20million dollars for the lakefront to buy land and build senior housing. We do not need to spend money to help a Hotel have a good view out the window! (Toilets upgrade was needed). the lakefront upgrage will not work as there is no parking for cars or buses at the lakefront. People do not walk out of their way to see a vista or ducks!

we do not need to spend 16.3 million to increase the level of service. roading is mainly subsidised. we do need to spend for growth. renewals should come out of rates not borrowing. Of the 7 challenges, only 1 and 2 are necessary. the government will pay you for the assets of 3 waters!

I have to laugh at No 7 as this council has contracted out most of its services so there is no institutionalised knowledge left anymore!!!

Houses and thriving communities

all the council needs to do is make sure the infracture and planning is available to developers. the council can develop social housing as needed.

There is no need to put money into the airport. all money at present needs to sure developers can buy planned land and develop. the council should not be a residential but a social housing developer.We do not need a wellness plan.

what is the PEKA block development?

Draft economic development plan

Planning to relocate the te ngae businesses to other heavy industrial land with noise restrictions.the agreed key priorities are what the council should be doing as part of its mandate as council.

we do not need 29 million of borrowed money spent on covid recovery, it is only a quick way of starting/completing fancy projects.

do not spend money on building projects. the museum can be opened up now! every building we go in has an earthquake risk.

climate change

It will be warmer in Rotorua and less rain, but more intense rainfall, plan for that.

we have plenty of paths to bike on,change the by-laws.

public transport is dead in Rotorua until the oil becomes very expensive. Let the buses roam quietly.

Interest rates.

the council needs to plan for interest rate hikes. At net 8.9% it is paying approx 15 million in interest at the end of 10 years 37 million a year nearly, nearly one-third of the rates revenue!

Further feedback on the UAGC and Rates:

Further feedback on the Long Term Plan:

* A water park would be well received, as a parent of under 10's

* changing rooms need a complete upgrade

* unsure of other facilities/rooms

*a designated swim lesson area would be good especially babies and those kids just getting their confidence in the pool.

*A slightly deeper pool for under 12's would be good too.

'Rotorua Aquatic Centre option 3

Very important community asset which delivers important benefits for all (including those who do not use it directly).

- Water Safety / Swimming skills

- General Health & Well being

- Community Centre for social gatherings

- tourist / visitor attraction

- positive activities for all ages & abilities

I am strongly for making this the best facility it can be

Further feedback on the Long Term Plan:

As a property owner, I attended the meeting with Starvos Michael on 21st April held at Lake Tarawera Community Hall. There it was evident as usual that everyone enthusiastically supported the reticulation project.

This has been so all the time the project was talked about and yet the council has been somehow so reluctant to make progress.... Finance is the sticking point, we understand. The reticulation has become virtually a compulsory provision for the Lakeside communities and accordingly the Regional

Council's rule book was re-written in 2008. Both councils should have made greater effort to sell the scheme to the property owners, rather than relying on local ratepayers associations or interested groups to which each and every member joins voluntarily. However, the 21st evening meeting showed almost 200+ members supported the project again. The sticking point was

the way the funding is to be secured.

Why has the Council been so discriminatory against Lake Tarawera ratepayers. The reticulation has been written in the Regional Council's rule book since 2008. Then, the Council should have been working with the communities including Lake Tarawera, to which it should have offered the same terms it had offered to other lakeside communities.

.

I do not drive at night for a long distance. That's why here I am sending this submission by email. You must accept mine and take this into consideration.

The Council allowed for the other lakeside communities to pay off the costs(or debt) during the next 25years. We simply want to be treated with the same conditions. That's all.

When back in 2006 when the Central Government set up Freshwater Deed (or this may not be the exact name?) which did not include Lake Tarawera. That should not be the reason the current property owners have to pay off the cost of the project as a one lump sum. That is what we, the local ratepayers were not able to understand and accept the Council imposed lump sum payment. The ability to pay as a lump sum is one thing but as a Council, it should treat its ratepayers in the same way and there are options available, just leave them to the indivisual ratepayers. Let us have options as you accorded to other communities.

Council has a lot of projects going on at huge costs, such as Lake front walkway construction, Museum strengthening project, the already completed Bike Hub 2 on Tarawera Road with toilet & shower blocks.

Who financed this facility? Is that a private facility? If so, the pump station facilities at Okareka was a shared use by the public project and a private enterprise?

It was evident that the attendees were all enthusiastically supporting the reticulation with the 25 years deferred payment arrangement which the Council arranged for the other lakeside communities' reticulation programmes. Why not make the same arrangements to our community? There should be no different treatment to this community. The equal condition, equal treatment are the base for the base of our society.

The twenty-five years is a long time during which lots take place to property owners themselves and their circumstances which may force them to let their properties go. The Council places some "caveat" attached to these deferred payment arrangements to release his/her debt off the book.

As for the rate increase, the Council proposed rate hike of 9.2% is utter shock . How dare you charge such an exorbitant rate hike? This is not a wish list consultation. Please explain.

Thank you

Humi Tremayne

Further feedback on the UAGC and Rates: Dear Mrs Chadwick,

I am writing to you about the proposed rates increase in the 10 year plan. I have completed feedback on the plan but I also want to especially ask you as an elected representative not to increase the rates.

I am very disappointed that the council would even consider raising the rates and to such an extent. It is such a disservice to the people of Rotorua. The rates on our family home are estimated to increase about 17%. This is a massive increase. Most people have not had an increase in income and there would also be those who have suffered from the economic effects of covd-19 and have had a decreased income.

What the council is proposing is cruel. How is the council expecting people to pay a rates increase? Are they supposed forgo essential items in order to pay rates? It will be like trying to get blood out of a stone. The increase will also affect those renting, as landlords pass on the increased rates cost.

The council should be there to benefit the citizens not put further stress on them. The best thing the council can do for its citizens is to put the citizens first and make a commitment to not increase rates but to trim back anything that is not essential and just concentrate on core services. Increasing council debt is not the answer either as this just makes the burden larger for the future.

I implore you to consider the people of Rotorua and oppose any rates increase.

Yours faithfully,

Kathryn van Dorp

Kia Ora Rotorua Council

I write today on 30th April to have a say that i know wont make a difference at all as the consultations were not consultations they were meaningless table talk with a lack of true financial integrity and for council to rush out as many ideas as you can put on paper with one month of so called community engagement with what 100 people from the community what a failure. RDC housing is not your job, consents are, RDC entering into any private borrowing means your owned and means you are dreamers who cant stick to the basics of your function this is dangerous territory you have hidden agendas leading to fulfil other plans ie Big government wants you to do and do not

include full disclosure in your community engagement, 3 vein waterways how dare this be given to a foreign communist country this is treason it is your job what is going on in this country who is china to us this is our resource you do not have the peoples interest at hand. You are now losing money for what reason no full disclosure again then what are they to sell it bottle it poison it send us a bill for it or are you still going to bill us when you have lost control of the most precious thing to people of the land. What is happening in this country you are out of touch with hubs stupid ideas empty hubs push people onto computers you have a library for that where the dept of internal affairs monitors everything. It seems to be a theme monitoring RDC have smart lights the most intense downlights ive ever seen with ability for survelliance as they are strategically placed i see these are rolled out in the west five eyes, why call it consultation when you really going to do what you want cause mummy said and because councellors passed this for a plan! what are we in a rush for another agenda to fulfill, who came up with this plan no councillors and yet you passed it. 500,000 to survelliace chuck it in there even though we dont want to turn into china its sure looking like freedoms and liberties are being eroded by council under a guise of safety what a joke no one scared we walk at night now with a stupid brightest downlight you could find. Hypocrisy is this council climate emergency and build build build electric buses yet poisonous batteries it is becoming clear RDC you have lost focus and are trying to be in a property game just pass all your own consents yet goto bed with who?? And they will end up being the council behind closed doors. What is the 300 million from the government for? why is this not mentioned in a plan. The aquatic centre needs basic makeover couldnt say how much more water how much more geothermal you would use, you dont even cater for families. In fact the hui is a sham too many things in reality build back better is not for Rotorua we aint Tauranga no ones coming anymore so just go back to the drawing board we dont need to rush we certainly dont need 9% rate jumps finish your silt walkway so we can walk over the effluent and be seen doing it as we carry on to our treasure house and morrison building.

Thanks

Aroha

Further feedback on the Long Term Plan:

I think that waiting 10 years to improve our sports fields in the area is too long. We currently have more than enough sports fields in Rotorua but they are in need of unguent care and attention.

There are currently several large areas of land that could be used for new sports fields without the need to close the only golf course owned by the ratepayers of Rotorua. Moving most of the sports to a central sports hub is going to disadvantage a lot of Rotorua locals that don't live in close proximity to the hub as they will be required to travel across town to attend club training/games (currently I believe none of the local sports clubs have requested or want to leave their current sports grounds).

Sport is a critical part of the Kiwi culture and we need to make sports fields as accessible as possible to the entire community. Doing this can potentially reduce crime rates as participation in sports is known to reduce the likelihood of a person being involved in crime.

The current grounds at Westbrook already have enough land available to create an extra 3 full-sized fields without any major redevelopment. The master plan is only offering 8 new fields for Rotorua and two of the rugby clubs have now been told that they might not need to relocate so this reduces the need for 3 other fields. Fields that have not been included in the master plan calculations are Jackson Park, Rowi Street Reserve, Jessie Marton Park, Glenholme Reserve, and Linton Park (at least 8 full-size fields). This does not even take into account that a lot of the club teams train at their local schools.

I do wish to see improvements for our sports grounds made a priority for our kids today and not in 10 years' time.

Kinds regards

Mark Smith

Subject 10 Year Plan.

Mark Gould

Against Present Plan.

I am against the present plan with Rate increases of Urban Residential Increases of 14.7%, 15.5%, 12.4%, 10.1%, 6.1% Farming Lower CV 18.1%, Business 6.7%, 5.1%, 6.7%, 6.1% Rural Residential 15.9%, 17.8%, 12.1%.These increases are too much for the current time.

With COVID 19, no tourists (up until last week), Lockdowns, NZ Economy being weak,

Shipping issues, overseas travel uncertain ,Government Debt increasing.Appears interest Debit charges increasing.(Press)

The Audit Report on Pages 40and 41 by Leon Pieterse of Audit New Zealand raises major concerns.

Uncertainty over 3 Waters reform.(Central Government Decision which will impact RDC)

Uncertainty over external funding of Capital projects Pages 11 and 29

Refurbishing of the Museum.Press Release recently stating Museum delayed 3 years no cost to Council.The impact is major as costs increase over these years and 3 years of no Museum Income due to doors not open.

Westbrook Sports Precinct

Aquatic Centre

Funding has not yet been sought.

With the Budget of 60 Million for Westbrook Sports Precinct it would be better to do a 2x 6 year renewals to Springfield Golf Club with rent reviews every 3 years.Look at this project in 12 years time to see if this project will go ahead in this area or another part of Rotorua.

My opinion would be Delay or Postpone.Do not go ahead and spend $60 Million Dollars plus.

Other Major concern is page 34 forecasted Debt position of 2021 over $200 Million Dollars and from 2023 to 2031 over $400 Million Dollars.Your page states Total revenue

238% against limit of 250%.RDC has no buffer for a real emergency if happens in Rotorua and effects Council.There is no guarantee revenue will increase to the levels as stated.

The present debt interest charges are too low and within the next 10 years will rise.This means the Council would need to find more funding to pay the interest.

My opinion would be not to increase the debt level over $200 Million Dollars as any debt over this figure would not be able to be repaid.Have another look at the budgets and there is 2 months to adjust the figures ,cancel projects or postpone projects.The 10 year plan would be signed of last week of June 2021.

Your report recommends to reduce the UAGC charge from $475 to $425 on page 37.I would be against this and would leave it at $475 as long as the Urban Residential Increases is less than 4%, Farming Lower CV at 18.1% too much Rural Residential to less than 4%.The Farming sector these figures need to be reassessed.NZ is a trading Nation and the farming sector is very important to NZ balance of payments.

With farmers having more income more money will be spent in the Rotorua area.

Page 2 states Work together, Collaborate,Cooperate

I would delay money being spent on

Inner City Incentives Policy

Development Contributions. (Council would increase its revenue in future years with developers completing projects.Need to talk to developers and find ways which they can increase developments)

Economic Development Action Plans (Issue with young people not wanting to take over retail businesses from parents or start new retail businesses.Not much selection of shops in Rotorua, Too many nail shops, vaping shops, Food places.Need more retail variety owner operators.)

Organic Waste Collection. Need to think of Green Waste first to reduce landfill.

Sustainable Forrest Approach.(A lot of money has already been spent in this area.Let the Forest Companies do more tree planting ,exporting of timber products)

Water Reticulation.Yes spend funds where required to maintain health.Be aware of Central Government and 3 Waters.

Three Waters Reform by Central Government.Wait and see what happens/there approach is .Who pays, what assets and RDC losses from loss of income.

RDC do not have the funds to develop 2 inner city apartment buildings.Leave this for developers and assist them with Council Charges and faster projects (consents)

Your report states 3000 sections.Need to work with developers ,faster development time less costs.Costs with some aspects of consents too high.

Plan change Wharenui Road to Airport (Mostly NZTA).Costs should be paid by NZTA.

Ngongotaha.Need to develop ideas with Ngongotaha Locals?

Plan Change to unlock land for development.Care needed due to flooding in the Ngongotaha area.

Aquatic Centre.Get RDC accounts/budget in order before spending $28.3Million Dollars.Fin Partners.Your cost possible forgetting debt interest charges.

Gang Culture.Should be Central Government and Police concern.Option 3 at this stage due to Council debt.

Draft Economic Development Strategy.At present 2021/2022 year Council could not afford.$20 Million Dollars relook at Budget and work out what is urgent and what can be delayed a number of years.

Forestry Companies are developing what interests are needed and seeking funding where required, Not Main Council Business.

Crankworx. Cancel this funding.Has had plenty of Council funding in the past.

Rotorua Lakefront Commercial and Hospitality Building.Seek outside partner or partners for funding.

Industrial Business Park seek outside funders.

Greenhouse will be an issue for future years, main driver will be Central Government.

Residential Land Development ,Look at cost of $10 Million Dollars.I do not think Council should pay for rather majority.

Climate Change.Do Farm Exports suffer.This is an area which also effects Central Government and BoPRC.Again NZ is a trading Nation without exports Rotorua will suffer.Need care in this area.

Propose 3 Water Reforms by Central Government.RDC could and would loose assets and funding.Less Rates.Would be better to know more information before large funding is made.Yes our pipes are old and need replacing.768 km of pipes.Rotorua we has 11 water sources .Pump stations need back up plant to maintain services.With 3 Waters Rotorua May loose the 11 water sources and this will add extra costs to Ratepayers.(Water will cost more and Water Meters will be required)

Sewerage Treatment.Need to have overall look at system due to recent failure at Eastside 2 months ago.

153 km of open drains too many major safety concerns.Example like eastside more people living there more people at risk, drowning of health issues.

122 km of unsealed roads.Still need to do regular sealing program.Farming sector pay high rates get little return and expect basic services.

26 Major Culverts.Will need to be inspected due to increase population and the Geothermal issues of the Rotorua Region.Sulphur eats and damages concrete.

Road Bridges some are too small and can not handle more heavier trucks.A number of bridges would need to be upgraded.

Your report states 385 km of footpaths but does not state the km number of streets which does not have footpaths.Some areas of town developed 70 plus years ago still no footpaths on one side of the street.These residents have paid a lot in rates over the years.People are living older and more people want to walk in there areas safely,not tripping over pot holes and slipping on dead leaves.

Bus shelters.Need shelters to be paid for by BoPRC.

Fees and charges.Need better service time and service from Council.

Rates increase 2022 Average of 9% Too High.Need to look at no more than 4% for the next 10 years.

Compliance and Regulatory costs, Look to Central Government to pay more in funding.

Adjust/Increase fees and charges.Look at value for money for increases and need a far better turn around.Do not wait for the last day.

Figure page 33 Museum 2022/2023 $55 Million Dollars wrong year due to recent press release.Museum costs have increased.No income due until 2025 need to down size

Income from this area for tears 2021/2025.

Aquatic Centre.Look for outside funders.$11 Million Dollars,$9 Million Dollars,$9 Million Dollars.May need to look at what is being spent and adjust or extend cost of centre.

Tarawera Sewerage Scheme.On going I've use with costs too high for residents.Need to look at time frame and work through costs.May need to go to Central Government cap in hand requesting more funding.Will costs over $20,000 per property be Councils costs knowing in the future Council will get extra payments in Rates higher value properties.

Lakefront.Is enough enough.Who Will benefit.Ratepayers?

SHMPAC Will the final cost be $11 Million Dollars.Who Will pay for the extra costs.Will the project be extended like the Museum.

The Councils Rate increases are compounded and Rates never come down.

The issue is Future Generations Will they be able to afford Council Rates.

People on fixed incomes can not afford the high Rate increases.

Example is people on Super Income only who own property in Rotorua are finding the Rate amount of there Super Payments are very high mainly single people over 65.

Sometimes the amount is over 20% of there Super Income.I do not believe any one who is a member of Grey Power and owns property is happy with Council and there proposed Rate Increase.

You have shown in your figures high Residential Property Values the rate increase is low.Is this fair?

The future Rotorua Council Debt of $400 Million Dollars Plus is just too much.

Please reduce costs.The CE may even have to put a cap on Staff numbers and hold staff increases in line with inflation.

Council needs to understand they can not, Spend , Spend, Spend.

The dangerous factor is Three Waters and what income and assets are taken from Council.

The CCOs at what cost to Council in Future Years?

Regards

Mark Gould

Further feedback on the Long Term Plan:

Kia ora,

I was just submitting LOCA's submission on the LTP on behalf of our committee and the whole thing just froze on me! Then it said it has closed. Please accept this as I was having some issues entering it on the system.

Please find as below our submission:

1. Aquatic Centre - Option 3 ($28.3 Million)

Feedback: As mentioned in the Rotorua Lakes Council Long Term Plan consultation document; “Our district is surrounded by lakes and rivers, therefore it is important our tamariki/children have the skills and confidence to be safe in our waters and the Aquatic Centre plays a vital role in this.” Lake Okareka is often frequented by swimmers. Residents know too well some fatal and near drowning incidents that have happened in the lake and swimming education is essential for safe enjoyment of surrounds.

Lake Okareka Community Association also supports the development of the Aquatic Centre for the facilities that it will provide for entertainment. What Lake Okareka has noted more recently, is the popularity of structures by sufficiently deep water. Along the Boyes Beach to DoC Campground Walkway in the Lake Okareka Scenic Reserve, well-worn paths have formed off the main track to jumping rocks. The increasing heavy use of these features has led to some erosion by trampling and pressures on the existing campground from day visitors (crowding out overnight fee paying guests). Similarly, the recently built Acacia Road boat ramp jetty has high piles installed for the purpose of jumping. The use of the jetty for jumping has caused some nuisance to boat loading – posing a safety hazard (one shared with the Harbourmaster).

Bomb’s, manu’s, gorilla’s, māngare’s, staple’s and cannonball’s are all a favourite pastime adventure in Rotorua waterways – the perfect combination of gravity and water. The increased celebration of this sprot following the 2019 Lake Tikitapu Bomb Competition has placed pressure on Lake Okareka as the main station near Rotorua. Council needs to recognise this interest, influx and the pressures that it generates on public areas. More features to jump off need to be provided at more places and the proposed upgrade to the Aquatic Centre is the best opportunity for this. The purpose built multilevel diving platform for ‘bombing’ absolutely needs to be built, incorporating the essence of this pursuit and made affordably accessible to all the public. LOCA fully support the redevelopment of the Centre to accommodate all water activities and safety for use by its own residents and the wider Rotorua catchment.

2. Community Safety: Option 1

Feedback: The Lake Ōkareka Community recently, within the last year, experienced an event where intimidation against residents was openly shown and a firearm discharged at the boat ramp. A police drug bust also took place in this past year. Despite the friendly atmosphere and Lake Okareka’s reputation, we are certainly not a gated retirement community. Crime does occur. Residents are becoming more vigilant.

Through a joint initiative with Rotorua Lakes Council, LOCA raised $50,000 to fund ANPR cameras at the two entry points to the community. We know that the information from these cameras are monitored by police and do assist in providing information that can lead to convictions and may act as a future deterrent. We are aware of an initiative by the Harbourmaster to install a camera at the boat ramp – we welcome this proposal.

Traffic safety is another concern of local residents – particularly at high use summer times. Through working with Council we are installing flashing lights to warn speeding cars to slow down. We will also continue to lobby for reduced speed limits from 50km/h to 40km/h through the community.

Broadly we support safer outcomes in Rotorua and in Lake Ōkareka. We receive many visitors from town and likewise our residents make full use of the Rotorua CBD and surrounds for work and leisure. Improving the safety of each is of mutual benefit.

3. Fees and Charges - Option 2 (Adjust/increase)

Feedback: Increasing fees and charges relative to the direct benefit services is nothing new for local residents. In 2010 Okareka undertook the upgrade of sewerage services with targeted individual ratepayer contributions a one off or annual payment to install systems to take wastewater from the catchment. We appreciated the additional funding from Central Government, Rotorua Lakes Council and Bay of Plenty Regional Council. The ability to have a range of options for payment was of benefit to ratepayers and the local community are now benefitting from the reduced input to lakes. We look to other catchments and express that similar opportunities for flexibility can help in achieving long-term goals.

LOCA understand that rates will rise and infrastructure spend in some cases needs to be targeted when there is a direct benefit. We ask that this is distributed fairly among the benefiting population and spread evenly over years by Council to reduce financial impact.

Most of the lake public facilities are not only used locally, but at times significant seasonal demand does come on services such as our boat ramp and reserves from visitors. We would want to encourage that any targeted benefit needs to consider all users of a service and not just those within proximity.

4. Your Rates - Option 3 (Retain at $475.00)

Feedback: The Lake Ōkareka catchment is a blend of rural and rural residential properties (some of the latter being bach/holiday accommodation). On one side of the coin, there is an easing of rates impact (UAGC at $425) for the rural properties (-4.66%) and on the other, an increase (15.75%). The general rate for residential ratepayers will shift to rural ratepayers, as well as seeing a shift from low value to high value properties. Lake Ōkareka Community Association recognizes that this will impact a majority members of its community relatively more due to higher property values – therefore it

Our rural landowners have seen a variety of RMA planning measures undertaken by both Bay of Plenty Regional Council and Rotorua Lakes Council in response to protecting lake water quality and natural amenity – respectively; Plan Change 10 and Lakes A-Zone Plan. It must be acknowledged that these measures have progressively affected rural landowners ability to generate income and capital value from their land. These changes have also largely been to the benefit of the rural residential population and visitors.

Setting the UAGC at $475, $425 or $400 makes no difference on the rate % for rural residential land owners (15.74%, 15.75%, 15.75%). However maintaining the current rate represents the largest decrease in rates for farms. On this calculation method we seek the status quo to support our rural areas in the catchment.

Further Feedback:

Lake Okareka supports long term investment and planning for the wider Rotorua Community infrastructure, housing and economic development. A “ready for business” focus provides opportunity for the employment and business of most of our residents and maintaining Rotorua as a place of choice keeps back owners and holiday makers coming back.

With respect to Climate Change, the risks to our catchment we have already seen with flooding and rainfall. The flood of late 2017 to mid 2018 affected many lakeside properties and caused significant impacts on the outflow to Lake Tarawera. These deluges have the potential to create significant erosion and sediment that can affect water quality. It also impacts on the walkway assets that Rotorua Lakes Council and LOCA work hard to construct and maintain.

Being in a bush settlement also poses a risk in drought and forest fire events. Having properties set against the greenery is attractive and valued, but provision to reduce the impact of fire to the area is best managed in coordination with emergency services – Lake Okareka is grateful for the services it currently maintains, including its new fire station, and would like to see that service is supported.

Adaptation to the incoming challenges of climate change will be important, as will the mitigations necessary to prevent greenhouse gas emissions to the atmosphere. LOCA supports this action in the Climate Action Plan and welcomes investigation into capital options to strengthen lakeside community resilience.

Our catchment is no stranger to the hazards posed by volcanic and seismic hazards – being part of the Okataina Volcanic Centre. We recognize that one road in and out of the Lake Okareka and Tarawera catchments (Tarawera Road) is, in itself, a potential hazard and adds to some complications around emergency planning. We are open to discussion about securing longer term access options in any event with Council and relevant landowners.

Mā te Wā,

Mitch Collins

Further feedback on the Long Term Plan:

Hi

The proposed rates increase is ridiculously high. During COVID many councils round the country implemented rates decreases or freezes but our council still increased rates as it has done every single year. While the councillors bizarrely stated that any suggestion of wage reductions for them was immoral (though it has nothing to do with morality) many many others suffered wage reductions and job losses or actually took voluntary reductions to enable businesses to survive (including the Prime Minister). Times are hard out there for many people (and it is specifically mentioned in the plan that Rotorua was one of the hardest hit areas with job losses and business

closures) so to propose a residential rates increase of between 11 and 15% is not fair and should not be necessary. Suggesting that this is reasonable because house values have increased is also not right. This does not help to cashflow additional expenses unless you sell your house, and even then, only if you do not buy another. Such a high increase actually seems immoral as ratepayers have no choice – we can't pick up our property and jobs and move them to a more reasonable council. If rates were subject to competition I am sure such high rises would not be proposed but the reality is the councillors have a captive market. They have a duty of care to look after those ratepayers, but this does not seem to be happening. It is not completely clear where all the money will go – it appears a large portion will go to "finish what we started" in capital expenditure which I imagine includes such projects as the water front redevelopment which seems a huge expense to fix something that was not really broken to start with (and many people opposed). It is also concerning to note that in your plan you have high proposed capital expenditure now (which will cover projects the current council / councillors are working on) but this dwindles over time to almost only 20% of existing levels in 10 years' time. Is this just because those developing the current plan feel that the budget in 10 years' time won't be their responsibility? It just does not seem realistic to expect a city to run with such limited capital expenditure from 2026 – 2031 (between 33 and 50 million a year) given the massive proposed spend of our current council next year - $158 million. The council and councillors need to develop a plan that allows them to run the city efficiently and effectively on a budget that keep the rates rises realistic and affordable for all.

Many thanks

Sarah

Dear Sir/Madam,

On 17th February 2021 we submitted a signed letter acknowledging that the proposed scheme to protect Lake Tarawera's water quality set out in Rotorua Lakes Council letter of 3 February 2021 was compulsory and would affect our future rates (by an estimated $30-$40 for wastewater).

RLC's letter did NOT ask us to agree to paying a lump sum for the new system, and nor did we assent to this in our letter of acknowledgement. The Council letter only requested 3 things of us

1) acknowledge receipt of the letter

2) acknowledge the scheme is compulsory and it will affect our rates (estimated at $30-$40 for wastewater)

3) to confirm our details

For the purposes of clarity we do not consent to paying a lump sum for the sewerage scheme.

Please accept this letter as our support of the submission made by the LTRA (see attached) apart from the LTRA's assumption in Clause 7.7 that by signing the letter of acknowledgement we were consenting to the payment of a lump sum.

Yours Faithfully

Malcolm and Jacqueline Ross (481 Spencer Road, Lake Tarawera)

Dear Rotorua Lakes Council,

I am writing to say our family support the Lake Tarawera Ratepayers Association submission, as attached, regarding the Reticulated Sewerage System.

We are keen for it to go ahead as proposed, but would like a repayment option. $33,000 is not easy to pay in a lump sum, we dont have that sort of money on hand. We would like a repayment scheme set up for ratepayers.

Thank you.

Helen St. George, on behalf of St.George family

To whom it may concern

I fully support the attached submission from the Lake Tarawera Ratepayers Association. A reticulated sewerage scheme for Lake Tarawera is URGENT and I and other ratepayers are tired of being fobbed off by Council. We have already been waiting for years for this scheme and in view of the declining water quality in Lake Tarawera it is essential that construction start this year.

This scheme must not be delayed. Please ensure that construction starts in July 2021.

Further feedback on the UAGC and Rates:

Further feedback on the Long Term Plan:

Subject: Tarawera Sewerage System

My wife and I attended the recent meeting held at Lake Tarawera regarding the proposed sewerage scheme and now wish to present a submission to Council.

1 We accept that some form of reticulated sewerage scheme is necessary for the good health of the lake.

2 We accept that a low pressure grinder and pump system appears to be the best compromised system available.

3 We do not accept that Council should force us to agree to an open-ended cost structure.

4 We believe that it is the absolute duty of Council to cost this venture properly at Council's cost and then present us with facts.

5 It is Council's job to do due diligence for its ratepayers. That is what our rates are for and we absolutely expect this to be done before presenting us with an uncosted proposal.

6 Council willingly demands $1.6/ $2.0 million per year from our small community and surely we can demand some sort of service in return.

7 It is also totally out of order to "blackmail" us with the suggestion that the $6.5 million could be lost if we delay and that it cannot be extended. That is "political" talk and we all know that if Council tries a little harder anything can be achieved. We have the absolute impression that this Council does not care at all and prefers to use its draconian powers to bully the residents into submission.

8 Proof of this thought is the paltry amount with which Council is subsidising the scheme . It is not even one year's rate demand from our community, and we all well aware that we get very little now from your huge rate demands.

9 Finally we are well aware that any significant public scheme run by Councils or Government always ends up with huge overruns. e.g. Transmission Gully road and just about any large or small public work. That means that the $33,000 could very easily become $50,000 or $60,000.

10 With that in mind then, when Council gets accurate costings to present to us, we expect that any overruns will be met by Council.

11 It is essential that some acceptable form of timed payments be offered. Like many of the residents we are elderly (84) and have no idea if we will have $50,000 as a lump sum available in 4 years time. Also what happens if we die? Do our children have to find the lump sum because we have committed them to it?

In summary we will not sign up to an opened cost structure until Council does its duty and gets proper costings, and presents a mature proposal, not the half baked, unprofessional and cowardly one we have at present.

To sign up to the present proposal would be irresponsible.

We fully endorse the submission made by the LTRA.

Signed D.C.Williams

Further feedback on the Long Term Plan:

Submission to Rotorua Lakes Council

I write to make a submission on the Lake Tarawera Sewerage Scheme. As a ratepayer for the past 60 years at Tarawera myself and my family are deeply affected by this proposal.

We support the plan for reticulation but believe the payment expectations are unjust, inequitable and unaffordable in the manner proposed by the council.

We fully support the Lake Tarawera Ratepayers Association submission which I have attached to this email.

We simply cannot afford to pay a lump sum of $33,000 that may increase. Other sewerage schemes in the district have been able to pay the cost off over time and we want to see the same treatment afforded to the Tarawera community.

We would also like a cap on the amount needed to pay and suggest $20,000. It is unacceptable to not know how much something is likely to cost before agreeing to pay for it. This is not how any other transaction operates.

We suggest council is in a far better position to borrow the funds needed for the scheme, to ringfence that borrowing and pay the loan off over time as money is received from ratepayers to fund it.

I would also like to point out that Tarawera ratepayers have not benefited from the same level of council services that Rotorua residents enjoy. We have no council operated water supply, sewerage, footpaths or street lighting yet we have paid extremely high rates for many decades without complaint.

Councillors are elected democratically and have a duty to listen to those that vote for them.

To reiterate, we fully support the Lake Tarawera Ratepayers Association submission attached.

Yours sincerely,

Peta Pepperell, Brice Pepperell, Susan Pepperell, Carole Pepperell.

Further feedback on the Long Term Plan:

Good Morning,

I am in FULL support of the LTRA Reticulated Sewerage Submission below, being a rate payer/bach owner of 80 Spencer Road. This proposal needs to go ahead as our property will most probably be Red Zoned as we wouldn't have enough suitable land for an on-site effluent system. It would be an absolute nightmare for us if this doesn't go ahead.

Please let common sense prevail and do justice to the water quality of our beautiful Lake.

Submission concerning reticulation of sewage at Lake Tarawera.

I am attaching the submission prepared by LTRA because it succinctly covers all the main points and I wish to add my voice to this submission.

On a personal level we have been at Lake Tarawera for 60 years and I think it appalling that we have had to wait so long for reticulation of waste water. Our septic tank is not ideal but it seems imprudent to spend a large sum of money on a 'fancy' septic tank while we are expecting

reticulation. We need certainty and it would be unfair of the Council, not to treat the rate payers at Lake Tarawera, in a similar fashion, to property owners at other lakes.

Surely in today's environment the protection of the water quality in Lake Tarawera should be at the top of the Council's responsibilities.

yours sincerely

Marian Saxton

Further feedback on the Long Term Plan:

I support the lake Tarawera Ratepayers Association's submission to Rotorua Lakes Council.

The RLC would be negligent in their duty to allow the unnecessary degradation of Lake Tarawera to continue.

Reasonable and fair payment options also need to be available to Tarawera ratepayers...

1. Lump sum payment on 'first flush' for those who wish to pay upfront.

2. Targeted rate over 25 years as offered to other communities. In addition RLC can partially compensate for their historical delays by passing on the favourable interest rate on any borrowings they would make to fund the scheme.

3. Proceed with urgency so as to minimise the risk of losing the $6.5M MFE assistance. The risk of losing this money is real and would unfairly impact the community if it was to disappear.

Regards

Peter Fahey

Dear Rotorua Lakes Council

Thank you for the opportunity for us to attend a consultation session with Councillors and to provide a submission on aspects of the LTP.

Long Term Plan consultation has coincided with Lake Tarawera ratepayers' consideration of RLC's proposal for the Tarawera Wastewater Reticulation proposal. Council has on several occasions invited local ratepayers to make submissions on the Reticulation scheme proposal within the LTP consultation process.

Accordingly, please find attached our submission with respect to the RLC reticulation proposal.

Kind regards

Patrice and Ray Gatland

Which option for the change in UAGC do you support?

Further feedback on the UAGC and Rates:

Further feedback on the Long Term Plan:

Both my wife Margaret and I fully oppose the Sewerage Scheme as proposed for the following reasons.

We oppose the idea of sewage pipes underground in an earthquake and mudslide area beside a world renowned lake, which if cracked or broken in an earthquake would send sewage pouring into Lake Tawera and ruining what we have worked so hard to prevent happening over the past 40 plus years we have lived in the community.

The statements regarding deterioration of water quality and human pollution are exaggerated and don't reflect the latest water quality survey put forth at a public meeting in February 2021.

Many residents at Tarawera claim they never have their septic tanks cleaned. This will be having an influence on water quality.

FINANCIAL:

The lump sum levy proposed is putting an intolerable stress and strain on many in the community.

Some. Particulary the retired elderly. It's impossible for those living on superannuation to pay such a large sum. It is outrageous to think people in their late 70's and 80's can service such a debt. Many have worked hard to reach retirement mortgage free only to be lumbered with an unforeseen debt.

Those starting out with a young family. Young families with a large mortgage are not able to take on such a extra large debt. The extra burden could lead to default in their mortgage payments resulting in forfeiture of the family home.

Those who are reaching the end of their working life are to be cash strapped for the remainder of their lives.

The scheme in it's present form appears to be a luxury that neither the council nor residents can afford.

There is a real prospect of people loosing their home owing to the huge financial levy and penalties that are threatened by council.

It's an open ended non capped levy which nobody should sign into.

LOCAL GOVERNMENT ACT 2002:

Territorial authorities' responsibilities include –

- Sustainable district well-being.
- The provision of local infrastructure, including water, sewerage, stormwater, roads.

It specifically uses the word 'provision.'

Definition of provision · the act or process of supplying or providing something.

If one is on an outing and it's stipulated that meals are provided it means you wont need to pay for your meals.

Nowhere can I find in the act that council at it's discretion can charge persons based on their address an extra levy. It must be spread over the jurisdiction of the area under the local government if it is infrastructure..

CONCLUSION:

This is a bad proposal, poorly researched and drafted. It's financially ruinous and as it sits outside the boundary of a local bodies social responsibility for health and environmental reasons.

To whom it may concern

We have much more serious issues in our community during these COVID times than spending millions of dollars on a swimming pool. We are surrounded in lakes, you cant get a cheaper swim than that for those families that cant afford an entry fee.

Community Safety is the role of the Rotorua Police not RLC. RLC should be focusing on the basic needs of our community such as sewerage reticulation.

I understand as a Lake Tarawera Ratepayer that I contribute to this community safety plan, however this does not even cover the Lake Tarawera community. There was an incident in our street, just a year or so ago, where a neighbour's home was broken into by a homeless person while the owners were away on vacation. He smashed a brand new ranch slider to get in, slept in their bed, smoked dope in their bedroom, used their bathroom and toilet, ate from their fridge and pantry and nearly set their oven on fire. He squatted in their home for 5 nights !!!. If we must have a Community Safety Plan surely it should extend to the Tarawera Community and any other community that is a RLC ratepayer.

Firstly I would like to express my strong objection to the proposed 2021/22 rate increase on my property at 12 Te Mu Road, Lake Tarawera, of 30.7%, as per the rates calculator on your website. This increase is absolutely untenable and I ask that this be reviewed especially bearing in mind that the Tarawera community do not benefit from the basic services that our rates contribution provides to the wider community with no water supply, sewerage, refuse collection, footpaths, street lighting and community safety to name a few!!!

Based on all the non essential, hugely expensive projects, that do not address the basic council responsibilities of our community, proposed in the RLC LTP, ratepayers are being unnecessarily financially burdened and this is simply not acceptable.

Furthermore, if you wish to be seen to be making a difference to climate change, then surely you should be supporting and funding the Lake Tarawera Sewerage Reticulation Scheme instead of expecting even more funding from the Lake Tarawera community. Please refer to the attached document for further edification.

Thank you for giving me the opportunity to comment and for your consideration of our views.

Regards

Peter and Judi Rice

Further feedback on the Long Term Plan:

Friday 30th April 2021

Please find attached some documentation I would like tabled at the next RLC LTP Meeting coming up soon.

I have not attended the small community meetings out at the lake where I live because I didn't like the tone of the meetings BUT fellow Tarawera ratepayer and resident Owen Dawe and I have been working hard on understanding what the usual process for the RLC has been to install sewage reticulation for all the other Rotorua Lakes and Todd McLay explained to us this morning at a private

meeting, that the fair and proper approach to the installation of OCET tanks attached to a sewage line should be the same as the arrangement made with the residents of the other lakes, which is that the RLC install an OCET grinder tank at each property, and pay for the reticulation infrastructure which the grinder tanks attach to, as well as service them and check them (just like at Lake Okereka he said) then we as resident ratepayers have a portion of the cost of the NEW sewage scheme installed by the RLC placed on our annual rates each year for years to come. (Council must provide the infrastructure under the Act of 2002 which outlines that local councils must provide new infrastructure for water and sewage)

As a Government Minister he was able to explain the acceptable and appropriate process for the installation of the new sewage scheme and he will explain that to you in his own submission which you will receive from him.

What ISN'T "usual" (he said) is for a local council to send a letter to ratepayers (which so many of us felt very frightened and threatened by), telling us we might be charged $33,000 per ratepayer "as a lump sum" and there would be "no exceptions" with a due date 3 and a half years away!

I almost fainted at the letterbox!

I have written many letters to the mayor and Stavros Michael (a "trail of emails" apparently) opposing the scheme if we have to pay for it as "a lump sum" and also voicing my concerns for disturbing the earth to instal the infrastructure, causing silt and flow to the lake and pollute the shoreline causing a mudbath instead of sandy bottom of the lake.

More recently I have become concerned about the stability of the infrastructure in the event of an earthquake, which we experience frequently between us, Makatiti Dome and the coast. We have had some sizable ones this year already. Damaged underground sewage pipes can go undetected for many years.

I have sought advice from a seismologist whom will provide me with data soon.

Todd said that the RLC have people to check the grinder pump tanks for us if we are ever concerned about them not working etc which is a positive. Apparently this is the norm for the neighbouring Lake Okereka properties.

Owen and I had no idea about ANY of this before we met with Todd this morning and certainly the small community group led by Fred Stevens didn't make any attempt to find out that we didn't have to pay for the scheme ourselves at al! What a waste of time those meetings were in my opinion.

At the February meeting of that small group, it was hoped that the NIWA specialists who tested the lake quality for us this year, would simply prove that septic tanks were to be eliminated because of increased nitrogen levels in our water caused by us as residents...only to discover its FARMERS...not us at all!

We don't even own a dishwasher or put fat or coffee etc down the sink we are so careful!

The "L Feather" document is now out of date and the water sampling may have been carried out in summer for example when bach owners with slumped tanks were here!

Well what would you expect!

The RECENT water quality findings (attached) are however very good and very encouraging. We pat ourselves on the back as permanent residents!

Having met with Todd McLay this morning, it is clear that the same fair process of sewage reticulation for all lakes has to be the same, meaning that the RLC has to pay for the complete and entire project for the new infrastructure then we as ratepayers have our rates increased in the same way the other lakes have, in fairness.

Knowing we in fact DON'T have to pay a lump sum of $33,000 is a great relief.

Todd did say that if a person was rich enough to opt to do that by personal choice, it may be possible that the rates rise may not apply to them.

We still need clarity on this option.

In the future, can the RLC never send out such frightening letters to it's taxpayer, ratepayer residents again.

All the unnecessary talk about "red stickering" properties who would not pay up and "no exemptions" must never be repeated.

Some very eldery people out at our lake, new home buyers, retirees and just ordinary hard working kiwi's were both scared and offended to have received such an awful letter.

The council needs to check all its facts in future before frightening a community as we needlessly have been.

The truth revealed to Owen and I this morning is all the council needed to impart to us.

Same fair process as all the other lakes.

I have had locals come on to my property when I've been happily weeding and watering my flower garden, asking me to sign that dreaded form attached to the letter too!

This "letter" has divided a usually united community.

The council needs to remedy this by way of an apology in the next letter we receive letting us know there will be no lump sum payment required, the council provides the infrastructure and we will see a rates increase to cover costs over future years.

Only approximately 240 out of about 440 residents have signed agreement of the sewage scheme because of the cost!

Once you tell them that the infrastructure cost will be covered initially by the RLC then our rates, (like the other Rotorua lakes) you will probably find people are far more receptive to the idea and welcome the change.

We have always cared about the lake so any scheme which will further be provided by the council to continue protecting it is important to us.

Our homes will one day be our children's homes and their children's homes and so on. Family assets for future generations and a very special place to come to.

So to summarise, I agree with Todd McLay that the Lake Tarawera Sewage Scheme needs to be provided by the RLC at their expense (as new infrastructure and in fairness and equality with other Rotorua lakes) and I strongly disagree that the ratepayers should pay anything else towards the scheme than additions to their rates over many years.

I will definitely not be paying the RLC anything other than a rates increase towards this new scheme if it goes ahead.

It seems that about 200 other residents may be of the same mind!

And without 75% approval for the scheme, the "usual" and "fair" process is the only way forward for this project.

All the best with working out the rates increase and the work project itself.

Kind regards,

Gillian Beatrice Cook (M.Ed L)

To whom it may concern,

Living in the lake area is a privilege and a pleasure that I do not take lightly. As a previous biology teacher who brought many into the area to appreciate the environment that is found at Lake Tarawera, I am keenly aware of the need to protect and preserve the natural resources that are found here.

However, I am also aware that the proposed lump sum that is potentially to be imposed on those of us who are rate payers will place considerable financial burden on many.

To that end, I fully support the recommendations and submission outlined by the LTRA Committee in the attached document.

Further feedback on the Long Term Plan:

I am emailing to support the LTRA submission on the Lake Tarawera Reticulated Sewerage Scheme. I agree with all points noted in their submission.

In particular, I believe Council should not impose a minimum of 75% replies from ratepayers before acting.

- Any residents who installed a new septic tank system in the past ten years was well aware that a reticulated sewage scheme was anticipated for the area. If they chose to install a septic tank

system regardless, then that is their choice and shouldn't mean they can now veto the reticulated scheme.

- Every ratepayer had the right to speak up and be counted. If a ratepayer didn't action their right, then they forfeited their vote. Just as happens in a General Election for government or council. It is unfair to say that ratepayers who didn't "vote" therefore voted against the reticulated scheme: it would be fairer to say the same proportion of these ratepayers agreed to the scheme as the proportion that did "vote". That's how it works for government and council elections.

Regards,

Sue Gower
